## MARKET GRAIN VIA THE HOG

A pertinent message came to the Malheur Enterprise this week from the Los Angeles union stock yards company. It said the state of California alone pays approximately \$50,000,000 a year for pork supplies coming largely from east of the Rocky Mountains. There is no reason why the states west of the Rockies should not supply this product and to our mind this would mean an enormous gain to western states.

We have the feed, climate and everything favorable to successful hog production.

The article called attention to the barley situation, stating that it illustrated the need for a more extensive home market. Feed it to livestock.

What is true of the hog and barley argument is true of other products. Hay fed to dairy cows brings big returns. Corn marketed via the livestock route, and so on down the line of staple crops, has long been championed by students of the farm problem.

## THE NEW NAVAL PACT

Although the five-power naval treaty for the limitation of armaments which it was hoped to make effective at the London conference has not been realized, a three-power agreement has been made between the United States, Great Britain and Japan.

Under the new treaty President Hoover declares that United States will spend about a billion dollars less on new warships than would have been spent if the conference had not been held.

In other words, while we must still spend about 600 million dollars to bring our navy up to parity with Great Britain, the plans previously made would have caused the expenditure of 1,600 million dollars.

While the new treaty does limit naval construction it

does not really reduce the size of existing navies. Furthermore, the treaty contains a clause which will permit the three powers to further increase their navies in case other nations which are not in the agreement enter upon an excessive building campaign.

It is hoped that France and Italy may be brought into the agreement later, but at London all efforts to reconcile the demands of these two countries were unavailing. So, although the conference did not accomplish nearly all that was hoped for, it can hardly be said to have been a failure.

## WHAT'S NEW?

A newly invented typewriter for the blind has been devised which weighs only three pounds.

Small sewing machines having only 35 working parts are being manufactured in Germany.

The latest telephone cables carry 3,636 wires packed in a diameter of less than three inches.

French engineers claim to have made plans whereby railroad trains may attain a speed of 125 miles an hour.

Oil drillers in California have succeeded in penetrating the earth to a depth of 9,350 feet.

By a newly developed process industrial alcohol can be manufactured from peanut shells.

Vale rejoices with Burns, the Harney county seat, in its bright outlook for continued growth as a result of the building of the Hines sawmill, one of the largest in Oregon. It is with pleasure the Malheur Enterprise acknowledges an invitation from the Burns Times-Herald to the Burns sawmill celebration May 8. All who can attend, let's give them a hand.

Four words constitute the text of every primary candidate's campaign—I want the nomination—but some have a better way of saying it than others.

Some daring girls are now wearing skirts reaching almost to the ground.

Filipinos are showing the effects of American culture. In Manila they staged a riot at a baseball game.

We may sometimes admit that our enemies are honest, but we will never agree that they have good judgment.

Most candidates favor building more schools, roads and other public works; also favor lower taxes. So do we, if it could be done.

Uncle Sam got out easy after all. It will cost him less than a billion dollars to build enough warships to comply with the disarmament pact.

An exchange denies the story about a souvenir hunter picking up a half-smoked cigar thrown away by Mr. Coolidge. It says the former President is not that wasteful.

One of the building experts says that the American people need four million homes a year—to stay away from?

## FARM HINTS

### USE MORE BUTTER

Some reasons why butter should be used liberally:

1. Butter is a concentrated source of vitamin A, necessary to the body for growth, protection against disease, good general health and long life.

2. Butter is an important source of vitamin D, necessary to the body for building sound bony tissue, prevention of rickets.

3. Butter is a palatable and easily digested food fat.

4. Liberal consumption of butter assures a nation of a rich and dependable source of vitamin A. Deprived of this source the people may suffer from faulty nutrition and dietary deficiency disease.

5. Butter, when added to a diet already regarded as adequate, may not only improve the general health, but so increases the rate of growth as to show greatly accelerated gains in both height and weight.

A woman has to be a lightning thinker in order to think before she speaks.

## Rupture Shield Expert Coming to PAYETTE

On Friday, May 9

At the Bancroft Hotel from 10 a. m. to 4 p. m.

Evenings by telephone appointments only

No Charge for Consultation

Mr. C. F. Redlich, the successful expert says:

The "Perfect Retention Shields" hold the rupture perfectly, no matter what position the body assumes or how heavy a weight you lift. They give instant relief, contract the opening in a remarkably short time and strengthen the weak tissues (the real cause of rupture) so that they frequently recover their previous natural retaining power, needing no further outside support. Stomach trouble, backache and constipation often caused by Rupture promptly disappear.

Truly remarkable and prompt results have been obtained not only with recent and not fully developed ruptures but also with old, long neglected ones.

Ingenious, recently perfected devices are now holding ruptures firmly which heretofore never had been retained.

No elastic belts nor filthy leg- straps are used.

I guarantee the durability of my absolutely sweat and moisture proof sanitary appliances.

75 per cent of ruptured children cover completely through expert mechanical treatment according to statistics.

Do not waste your money on widely advertised mail order contraptions. You cannot fit yourself. C. F. REDLICH, Rupture Appliance Expert, Home office, 535 Boston Block, Minneapolis, Minnesota.
