WAIVER

In consideration of the proposed sale of the Assets of the First National Bank of Ontario, Oregon, to the Ontario National Bank of Ontario, Oregon, for which, as a creditor of the First National Bank, I am to receive 70 cents on the dollar of my deposit and 70 cents on the dollar of any accrued interest on Savings and Time Certificates, plus my proportionate share of the further sum of \$10,000 in cash and any stockholder's assessment liability collectible, the undersigned does hereby waive thirty per cent of any and all amounts had on deposit in checking account, cashier's checks, certificates of deposit and savings account in said First National Bank at close of business September 12, 1931, subject to the credit of my deposit on any obligation owing to the Bank.

The remainder due me under this waiver is to be paid in cash on demand by the Ontario National Bank as soon as depositor claimants have signed this waiver and the assets of said Bank have been delivered to the Ontario National Bank, and I further agree to assign or endorse at the time of signing this waiver any certificates of deposit, cashier's checks, or saving accounts held by me, and deposit same at the First National Bank.

I do further appoint the Depositors' Committee of the First National Bank my agent to act for me in my stead in collecting the stockholders' liability, and to act for me in all other matters in which I may be concerned as a creditor of the First National Bank.

Address

Waivers must be in by October 10, 1931.

"How Much
does a GOOD Water System
Cost?"

THERE are no better water systems built than the MYERS. Yet the owner of a MYERS Water System actually pays less for water than most city folks do. A MYERS Junior Direct Water System for shallow wells, costs only \$75.00 complete with motor ready for installation and delivers 250 gallons of fresh water an hour. For \$105.00 you can get a complete MYERS pressure tank system ready for installation like that pictured. And even if you use lots of water, the daily power costs for running one of these systems is only a few cents.

Remember, MYERS makes water systems for both deep and shallow wells, for operation by electricity, gasoline engine, windmill or hand power, with capacities from 250 to 1000 gallons per hour. The most complete line in the world.

MYERS
Self-Operating
Water Systems

FIG. 2510 shows a complete Water System Unit for wells up to 25 feet in depth, with 41 gallon pressure tank. Fully automatic in action—self-starting, self-stopping, self-cleaning. Capacity 250 gallons per hour.
