## THE VOTER PAYS

This much can be said for the new revenue bill—it will probably balance the budget and remove any danger to American credit, if such there was.

This can be said against it—it takes in another long step toward a tax condition similar to that of England, Australia, Germany and the other tax-

distressed countries. The levies against gasoline, lubricating oil, tires, electricity, the check and bond taxes, the state tax will work hardships on millions of our citizens. The income tax increases will doubtless cause a further flow of capital into tax-free government bonds, thus taking money out of the channels of trade, and away from industries sorely in need of funds.

There is one lesson we should have learned—that undeviating watchfulness is the price of economical and efficient government. If we have to pay greatly increased taxes we have ourselves principally to blame—we gave officeholders all the rope they wanted and they are slowly strangling us. The American has been indifferent to the operation of his government. He has been a poor stockholder. He is paying now.

The tax fight never ends. It is time we laid our plans for doing what we can through the power of ballot, to make tax reduction a reality in the future.

## HELPING DAIRYMEN HELPS US

Butter days will bring better days. This is the opinion of many Oregon restaurant managers and housewives who are cooperating in the state wide movement to increase the use of all dairy products during the present period of high production and reduced prices. The plan has been prompted by two main reasons; first because butter is the most appetizing and satisfactory flavoring ingredient for all foods, besides being an economical source of energy; and second, because the returns from dairy products are the principal source of income for over 50,000 Oregon farmers and furnish a day-to-day payroll for many Oregon cities.

More ice cream and whipped cream will be featured and cheese and cottage cheese salads will occupy a prominent place on every menu.

The plan has received the endorsement of prominent physicians and health authorities who feel that present low prices on butter, while working to the serious disadvantage of the dairymen, will be reflected in better nutrition and better health among the general public. Business men and banking interests are backing the plan because of their realization of the importance of the dairy industry to all lines of business in the state. In some counties, where lumbering has been the principal pay-roll industry, dairying has taken its place and the day-to-day income from cream and milk is keeping the wheels of business turning.

A manufacturer tells of an automobile that can go 140 miles an hour. Well, one thing's sure—if it can, it will.

When Malthus predicted the eventual overpopulation of the earth he was unable to foresee the era of automobiles, gunmen and synthetic liquor.

"What's in a name?" Plenty, if it happens to be Roosevelt.

## CHILDREN CLOSE VACATION SCHOOL AT CHURCH THURSDAY
