Cook Electrically!

Electric Cookery! Cleanest, easiest, most pleasant of all methods. In the last few years more than 14,000 Idaho Power customers have found relief from the drudgery of cooking by installing electric ranges.

"Here's what an electric range will bring to your kitchen: An oven that comes up to baking or roasting temperature very quickly—an oven control dial that automatically holds the heat at the exact degree for the best results—an electric clock that turns on the heat at the time set, then shuts it off and keeps the food hot until served. It gives you whole afternoons of leisure; to read, shop or visit—as you please.

Electric heat is perfectly clean. It cooks as fast or faster than any other type of fuel—it can't blacken pots and pans; can't smoke up walls or curtains. The range itself stays spic and span as a china dish. Food never loses flavor or wholesomeness because they're cooked with scientific accuracy.
