Accurate Cultivation Means Bigger Profits

"Hit-and-miss" cultivation is little better than no cultivation at all.
Be ready to get all the weeds this year with a

John Deere KC Cultivator

The KC works all the soil and cuts out the weeds. Its beams are always parallel, even when dodging on crooked rows—its sweeps or shovels always point straight ahead and cut out full width and are held level—cut at same depth under all conditions. The ground is left level and weed-free.

You make every adjustment from the seat as you drive along—raise or lower both rigs at once with the master lever; space them with the spread lever; tilt them with the tilting lever. Quick dodge through pedal control—your boy can do thorough work with the KC.

Drop in and see the KC next time you are in town.
