

LITTLE FRIEND OF PROFESSOR DAVIS BOWS FOR QUEEN

R. J. Davis, old schoolmaster of Nyssa, agrees with other folks back home that Ambassador Bingham proved a diplomat at the recent London economic conference. It was through Mr. Bingham that Miss Margaret McReynolds, 17-year old daughter of Congressman S. D. McReynolds of Tennessee, was presented to the king and queen. Twenty-five year ago, McReynolds was a favorite student of Professor Davis at Pikeville, Tenn., college hence his approval.

Miss Margaret was among the ladies of the American delegation in London. Her father purchased a presentation gown and Miss Margaret spent long hours practicing the correct curtsy to royalty. The news of the great honor was flashed back home—and then came the blow.

The court chamberlain announced that no wives or daughters of delegates would be presented. There wasn't room to accommodate them all.

Judge McReynolds roared in good old southern style but Margaret pout-

BOULDER DAM MUST COOL LIKE OWYHEE

Washington, July 1—Keeping the concrete cool while it "sets" will require about 150 miles of 2-inch iron pipe in Boulder dam.

Owyhee dam in Eastern Oregon, a previous Titan of engineering, provided lessons in the behavior of concrete which the department of the interior has found useful in the construction of Boulder dam. One-inch pipe was put into the cooling system at Owyhee, at each consecutive 4-foot layer of concrete. As it hardened the mass rose to a temperature of 118 degrees, which is unhealthy for a dam, creating cracks and fissures.

Water that registered 64 was pumped through the pipes and in two weeks reduced the temperature to 84. Cold water is coursing through the larger cooling system of Boulder dam as that structure rises. Without this cooling influence, it is said, hundreds of years would be required to rid the dam of excess heat, and serious results might come.

WILD FLOWERS

If you would be interested in exchanging seeds, bulbs, plants of wild flowers for those of garden flowers, please send me a list of varieties which you can secure. NOTE: Native plants must be collected only according to strict conservation methods. Explanation by letter. M. R. Bouffloux, Molalla, Ore. June 29th

GALE DOES DAMAGE IN ADRIAN SECTION

Adrian—A very strong wind coming from the west did considerable damage to Adrian citizens Saturday. The most costly damage was the breaking of a large plate glass window in Holly Brothers store. Many trees were uprooted and haystacks north of here were scattered badly.

E. G. Hopkins, barber here for several years, left Adrian recently. Wm. Ashcraft is operating the shop.

Chas. E. McConnell and family left Sunday for a weeks vacation at Warm Lake and various other places in the Idaho timber. Wilbur Roberts and family also are on an outing in that section.

Mrs. R. R. Overstreet was hostess at a joint meeting of the Colony and Wade Parent-Teacher associations Friday. Mrs. John Timmerman's sister Mrs. Garrit Stam of Nyssa, who recently returned from Holland, gave a delightful talk.

Jake Long of Jordan Valley stopped here Sunday on return from the Nyssa-Boise game.

John E. Holly accompanied by his family were Boise visitors Monday. Mr. Holly purchased a new widow for the store.

The M. L. Judd family and Mr. and Mrs. R. R. Overstreet are enjoying a vacation at Wallowa Lake. Walter Pinkston is taking care of the ranch.

The garage owned by the Holly Bros. was leased by Bill Ashcraft and Jim Martin. Lowell Ashcraft, former lessee, is leaving soon.

A 200-pound cheese has disappeared in California. Maybe it will turn up in the Sandwich Islands.

SPEAKER IS COMING

Mrs. Maude Aldrich, officer of the national W. C. T. U., has advised the local union that she will come to this city early in July for the purpose of urging the retention of the 18th amendment. Mrs. Aldrich has just attended the national convention at Milwaukee.

NOTICE

IN THE MATTER OF THE ORGANIZATION OF THE JORDAN VALLEY GRAZING DISTRICT.

NOTICE IS HEREBY GIVEN that there will be a meeting of the Grazing Board of Malheur County, Oregon, on the 2nd day of August, 1933, in the County Courtroom in the Courthouse at Vale, Oregon, at the hour of 2:00 P. M., for the purpose of considering the petition for the formation of what is known as the Jordan Valley Grazing District, the boundaries of which are as follows, to-wit:

Beginning one-fourth mile east of the northeast corner of Section 1, Township 24, South, Range 46, E. W. M., thence west on the township line to the center of the main channel of the Owyhee River; thence up the center of the main channel of said River to its junction with the south fork of the Owyhee River; thence up the center of the main channel of said south fork of the said Owyhee River to its junction with the Idaho-Oregon State line; thence north along the Idaho-Oregon State line to the point of beginning.

Objections to the formation of such district in writing, and verified, shall be filed with the County Clerk before such time. At said time the said petition will be heard by the said Grazing Board.

This notice is given pursuant to an order of the Hon. David Graham, County Judge, made and entered on the 5th day of July, 1933.

Roy Daley, County Clerk.
July 13-July 20.

NOTICE OF FINAL REPORT

IN THE COUNTY COURT OF THE STATE OF OREGON FOR THE COUNTY OF MALHEUR.

In the Matter of the Estate of LUDVIG THEODORE LARSEN, Deceased.

Notice is hereby given: That Annie Larson has waived all accounting, and as executrix of the estate of Ludvig Theodore Larson, deceased, has rendered for approval her final report of her administration of said estate, together with her petition for final distribution, and that Friday, the 28th day of July, 1933, at 1:30 o'clock in the afternoon, at the courtroom of said court at the county courthouse, has been fixed as the time and place for the hearing of said report and petition, at which time and place any person interested may appear and file his exceptions in writing to the said report and contest the same.

Notice is further given: That said report is for final settlement and on approval thereof final distribution of said estate will be immediately had.

The date of first publication is June 29, 1933, of last publication, July 27, 1933.

ANNIE LARSON, Executrix.

BREAD THEN AND NOW

Imagine, if you can, eating bread which has been kneaded by being stomped about under the feet of your baker! Yet many years ago the ancient Egyptians were making their bread in just that manner.

For long centuries these breads were flat and unleavened. It is impossible to say just when yeast, or leaven, came into use. But that it was used long ago is proved by the fact that there is frequent mention in the Old Testament of both leavened and unleavened bread.

There was a time when bread, such as we now eat daily, could have appeared only upon the tables of the extremely rich men. That is a good thing to remember when you are about to decide that you were born too late.

Good bread was once a distinct luxury. Today it is essential to any table. It was once kneaded by foot. Today it is manufactured under the most sanitary conditions in the most immaculate kitchens. Machinery sees to it each loaf is light, white, and wholesome. That is because bread is now made in bakeries like the Gem State Bakery in Payette. Even home-made bread has been unable to hold its own against the fresh crisp bread baked in the ovens of this bakery. And housewives are glad of it, too, for it has left them free from the drudgery of baking.

The Gem State Bakery's bread is a real energy giving food. Made of the best wheat flour, it is rich in energy-producing carbohydrates and in muscle-building proteins. Everywhere people are demanding it for their tables.

Tasty Menus At Great Savings

The Independent Market and the Wall and Rawlings Food Stores of Ontario is a place where quality, service and satisfaction meet—and where people from the surrounding territory go to find the perfect provision every day and now are so busy that all goods are turned quickly which makes for a new and fresh stock and lower prices.

Few, if any meat dealers in this section has attained a reputation equal to the Independent Market and the Wall and Rawlings Food Store for the accommodation of the public. They have an enviable reputation for cleanliness; insisting that everything about their place be in accordance with the most scientific ideas regarding sanitation. Thus, they have assured the public that fruits, vegetable and groceries from the grocery department and meats and fish from the meat market of the Independent Market are fresh, pure and wholesome.

The management of the Wall and Rawlings Food Store takes a just pride

in the splendid reputation that the store has built through fair and friendly treatment of its many patrons. But today, people are asking more of grocers than that they be fair and friendly. They are asking for more than fresh fruits, vegetables and groceries. They are asking that these things be priced as lowly as possible.

The Wall and Rawlings Store invites you to compare their prices with prices asked for the same foods elsewhere. They realize that economy is foremost in many minds and they make economy possible by offering these fine groceries at the lowest prices obtainable anywhere.

In this edition we wish to compliment Mr. Robinson, the manager of the Independent Market, as a man that makes a continual study of the meat problem. We would advise anyone having trouble with the provision problem in any way, to visit the Independent Market and the Wall and Rawlings Food Store and make all the family happy by furnishing them with pure food and a balanced meal.

TRANSPORTATION THEN and NOW

The only convenience for travel and the handling of freight in ancient times was the riding of camels, elephants and horses. Handling and moving commodities must have been a problem in those days. A little later chariots were used by the upper classes of Egypt, while in Rome they were in general use. One of the biggest problems of those days was the lack of roads for the chariots. However, much progress was made in Rome in 331 B. C. when the celebrated Appian Way was constructed.

The history of man's study of the problem of moving from place to place, also his problem of moving commodities, is interesting indeed. For instance in the sixteenth century when the first covered chariots became the practical means of transportation they were found to be so superior to the backs of camels, elephants, sedan chair carriers and boats that they commenced to "step on the toes" of the above means of transportation. At once the officials of the day were induced to forbid the operation of these new and more practical means of transportation. The writer is of the opinion that we are much farther advanced today than we would have been had the officials of 1900 passed laws forbidding

automobiles and trucks because they were "stepping on the toes" of the livery stable operators.

But back to the early day chariots. They were rude affairs, some, in fact the majority of them, having wooden wheels cut from large logs. How different today. It would have to be some log to supply wheels with ability to carry one of the Wayt Transfer Company's large modern trucks.

The Wayt Transfer Co., in Ontario is a very good representative of modern transportation. No concern in this section has given this business more careful attention than this well known concern. The conveyances which they operate are large ones and the employees who operate them are especially skilled in this line of work.

The owners and employees of the Wayt Transfer Company have at all times been ready to lend their assistance to all propositions that promise development of this part of the state.

We take this opportunity to compliment this concern upon their success and to urge upon the people that their service should be appreciated and placed first in the minds as they are aiding in solving the transportation problems of the day.

FIND SPEAR HEAD ON SUCCOR CREEK

F. S. Zimmerman, J. M. Fields and D. H. Snowberger of Payette report an interesting trip to the Succor creek

country in search of fossils, wild plants and other curios. Zimmerman found an Indian spear head about 14 inches long, and incidentally several rattlers. Snowberger gathered quite a collection of wild plants for his nursery at Payette.
