EVERY FIBER EVERY CORD EVERY PLY IS **BLOWOUT PROTECTED** BY *Gum-Dipping*

BLOWOUTS are caused by frictional heat generated in the fibers of the cotton cords in a tire. Firestone is the *only tire built with every cotton fiber saturated and coated with pure rubber*—to prevent destructive heat. This is one of the reasons why Firestone Tires have been on the winning cars in the 500 mile Indianapolis Race for 14 consecutive years—the world's most severe blowout test.

Rubber has gone up 242%, cotton 115%—substantial tire price increases must follow. We will give you an attractive allowance for your old tires on new Firestone High Speed Tires.
