• You've heard and we've heard a lot of tire claims but here are facts straight from Akron: The Goodyear people have completed more than 8,400 stopping tests on automatically-braked cars equipped with various makes of tires both new and worn. By accurate measurements on wet slippery pavement, smooth tires slide 77% farther than new Goodyear All-Weathers—and other new non-skid tires slide 14% to 19% farther than the Goodyears. These figures check with the experience of our Goodyear customers and ourselves. How safe are your tires today?
