Every Conceivable Force WORKED TO TEAR THESE TIRES TO PIECES

Best
NOT ONE CORD LOOSENED!
NOT ONE TREAD SEPARATED!
Not one Blowout!

AS thirty-three speed demons careened and skidded around the steep banked curves of the hot brick track, tires shrieked and smoked . . . break-neck speeds, 150 miles and more down the straightaway force tugging to rip the tread from the body of the tire. In fact, every conceivable force worked to tear the tire to pieces, but not one cord loosened—not one tread separated—and not a single blowout. What amazing proof of Tire Strength—Safety—Quality and Dependability.

Every one of the thirty-three drivers at the Indianapolis 500-mile sweepstakes chose and bought Firestone High Speed Tires. The fact that not one of the 132 tires failed is your greatest guarantee of the Extra Safety—Strength—and Dependability built into Firestone Tires.

The New Firestone High Speed Tire for 1934 is Safety-Protected on the outside by a wider tread of flatter contour, deeper non-skid, more and tougher rubber, giving you more than 50% longer non-skid mileage—Safety-Protected on the inside by eight additional pounds of pure rubber absorbed by every 100 pounds of cords. This additional rubber surrounds every cotton fiber inside every cord in every ply. This is accomplished by the Firestone patented process of Gum-Dipping.
