American OIL BURNING HEATER

It is a beauty to look at . . . and it is a dandy for heating. Built like a furnace with giant heating surfaces. Burns low priced distillate or fuel oil and will give you care-free healthful heat.

The American Oil Burning Heater requires practically no attention except to fill the fuel tank once a day, and it also saves you from the dirt and drudgery that comes from using wood or coal as fuel.

Styled by Walter Dorwin Teague, America's foremost industrial designer, this heater will prove a source of pride in your home no matter how fine its other furnishings. Don't fail to see it. It's the heater you have been looking for. We have a size and type to suit your needs and a price that is right.
