Double Wear Cuts House Paint Costs In Half

DEVOE SCIENTISTS have discovered a way to make paint that lasts twice as long as ordinary kinds. Two kinds of paint are used together, on an entirely new principle. The undercoat seals the surface, so that old paint or wood won't suck up the life-giving oils. The top coat resists sun's rays and other elements... resist checking, peeling, cracking and fading. Save money by using DEVOE PAINTS!

Devoe House Paint

can be had in many attractive colors. The new Devoe 2-coat paint keeps your house looking new and fresh longer. The colors hold fast and true through sunshine, wind, rain and dust. Strictly a QUALITY paint, Devoe actually costs less because of greater "yearage"... less cost per year. Ask for a color chart. Let your Boise Payette man explain the marvelous new 2-coat Devoe House Paint.

Devoe Floor Varnish

dries hard overnight. It produces a glossy finish that takes much of the work out of housekeeping. It's easy to keep clean, and its tough surface will withstand the tread of many feet. Be sure to include Devoe Marble Floor Finish in your list of paint needs. It's equally good for linoleum or wood floors.

DULTEEN

Wall Finish

Dulteen colors are smart, new, clear and bright. There's a tint or shade for every room, every color scheme and every period of decorative style. It is superior to ordinary kalsomine, in that it produces a surface so smooth that it catches less dust. Hence requires less cleaning. Ask for color chart.
