It Puts an End to Oiling Worries

This "cut-away" view was prepared just to show you how efficiently the John Deere oils itself. That self-oiling feature is one of the big reasons for the steady power and long life of the

John Deere Type E Engine

The simple splash oiling system insures the thorough lubrication of every working part. Clean oil is kept circulating—every important working part is bathed by a spray of oil while the engine is in operation. Oiling is stopped automatically when the engine is stopped—no oil is wasted. Messy, easily forgotten sight-feed oil cups are done away with and friction,

one of the greatest of power thieves, is reduced to a minimum by this positive automatic oiling system.

Come in and have us show you how efficiently the John Deere oils itself. Examine the simplicity of design and the sturdiness of its parts—the John Deere engine will do its work steadily and efficiently and will stand up under severe conditions on your farm.

Be sure to see this all-enclosed self-oiling power plant next time you are in town.
