

Says Power Bill Is Impractical

Those who expect to go to the polls in November have a lot of studying to be before that time if they expect to act intelligently upon the gist of measures that will be before them, according to Elbert Bede, veteran reading clerk of the Oregon Legislature, who probably has read more bills than any other person in Oregon. He visited here last Tuesday while swinging around the state as a representative of Oregon Business and Investors, who are handling a campaign against the state power bill and the hydro-electric amendment, companions on the ballot.

"It is difficult," said Bede, "for voters to interpret proposed laws because of their unfamiliarity with the tricks for legislation, because of the things put into many measures which votes are not expected to understand, because voters as a rule do not know the purpose of portions of many measures, and because they do not sense how one measure may dovetail with present law or may make present law ineffective."

Speaking of the power bill, Bede said, "I do not seriously question the sincerity of its backers, but I do seriously question the wisdom of giving inexperienced men \$18,000,000 of our money as a minimum for the purpose of duplicating present privately owned property, or for the purpose of making present property valueless, thereby taking millions off the tax rolls."

"I believe, so far as getting Bonneville power is concerned, it would be wise to let the federal government find a way to deliver it to present distribution systems, or to system to be constructed by utility districts, municipalities or private capital, with rates controlled by a federal commission and our own utilities commissioner."

"The two power measures, as well as others, should be studied carefully and no voter should give a yes vote until he knows what he is doing. In territory east of the mountains, I have found many who are worried by the practical certainty that, under the power bill, the commission would take over every fraction of a second-foot of water not already appropriated."

Salutes Sacred Cow
In saluting a sacred cow, a Hindu first touches the animal with his fingertips, then brings his fingers to his lips and breast in salute.

Scenes and Persons in the Current News

1—Rev. Charles E. Coughlin being interviewed at the Cleveland convention of his National Union for Social Justice which endorsed Lemke for President of the United States. 2—Coast artillery of the Illinois National Guard turning on a giant searchlight during the war maneuvers in the Middle West. 3—Portrait of Gen. Francisco Franco, commander in chief of the rebel forces in the Spanish civil war.

ADRIAN SCHOOL NOTES

The Adrian grade school now has an enrollment of thirty pupils, with thirteen in the eighth grade; nine in the seventh; and eight in the sixth grade. This makes the total enrollment of District 61 which includes both the Adrian and Kingman Kolony schools, ninety-three. Last year when school closed the total enrollment was around eighty pupils.

New seats and equipment have been purchased to accommodate the additional pupils and from early indications the enrollment should be well over a hundred when school closes in May.

Mr. Hewitt and several of the seventh and eighth grade boys spent Saturday morning laying out the basket ball field and building the basket ball standards. The new basket ball field will be directly behind the Adrian school house. Practice will begin this week. Both the boys and girls will have a team and are looking forward to a successful basket ball season.

Using Honey

By Mrs. W. W. Foster

Have you tried putting up at least part of your fruit with honey to give your family a treat and variety? Peaches and pears especially are extra fine canned with honey as it intensifies the original flavor. Charts for processing are given in Farmer's Bulletin 1471, U. S. Department of Agriculture.

The American Honey Institute of Madison, Wis., in their pamphlet "Use Honey for Canning and Preserving" give the following directions:

For tart fruits such as cherries, plums and apples use either:
All Honey Syrup—2 cups honey, 33-4 cups water; or Honey and Sugar Syrup, 1 c honey, 1 c sugar 4 c water.

For raspberries, peaches, pears or pineapple use either:
1 cup honey, 2 cups water. Or ½ cup honey, ½ cup sugar, 2 ½ cup water.

To prepare all honey syrup—Bring water to the boiling point; add honey, stir, let come to a good rolling boil; skim and it is

ready for use.

To prepare the Honey and Sugar Syrup:

Bring water and sugar to boiling point; add honey, stir, and bring to boiling point; skim and it is ready for use.

Cold Pack Method—Pack well prepared fruit in sterilized jars. Cover with boiling syrup and process.

Oven Method—Follow cold pack method and process according to directions furnished by electric stove company.

Open Kettle Method—Add just enough water to prepared fruit to boil. When fruit is cooked add one half cup of honey for each quart of fruit, bring to a rolling boil once more, skim and fill sterilized jars and seal at once.

Build Now for Winter Comfort
So counsels the Building Bug, veteran of many building campaigns.

Homes started now can be finished for winter occupancy! Plans, as you like them; estimates within your budget; specifications that insure quality and permanency are a part of Boise Payette service without extra cost. 4-Square, thoroughly seasoned lumber speeds construction with exclusive milling features and adds to strength and durability of the finished home.

GOOD BYE Forever To HIGH Fuel Bills
If the size of last winter's fuel bill gave you a pain in the pocketbook . . . if you want to save some real money on fuel next winter . . . just put BALSAM-WOOL Blanket Insulation in your attic. Application is amazingly quick and inexpensive—but it cuts fuel bills as much as 30%.

TERMS
... under the FHA Insured Mortgage System, are the most liberal and convenient in home-building history. One monthly payment takes care of all items, including interest, payment on principal, taxes and insurance. Does away with "saving up" for yearly payments. Makes building as simple as paying rent. Ask us!

Take another tip from the Building Bug:
"Kiln-Dried and Seasoned Framing Lumber makes better construction."

Now in effect
SPECIAL SUNDAY RATES
for Long Distance telephone calls
AND
REDUCED PERSON-TO-PERSON RATES
after 7 every evening

REDUCED Long Distance rates which apply on station-to-station calls after 7 p.m. each evening are now extended to include all hours on Sundays.

Rates on person-to-person calls are also reduced from 7 p.m. to 4:30 a.m. every night and the same lower rate applies at all hours Sundays.

(This generally includes all calls on which the day station-to-station rate is more than 35 cents)

You can now enjoy more frequent contacts with members of your family living elsewhere... with the folks back home... sons and daughters at college... far-away friends. Call them Sundays or any evening after 7 p.m.

For any additional information on these reductions, just call our Business Office

Malheur Home Telephone Co.
