

WORLD'S GREATEST SPECTACLE

The Grand Canyon is always described as the world's greatest spectacle by the thousands who visit it each year. There is nothing in the world which approaches it in form, size and color. From Bright Angel Point on the North Rim, the canyon is thirteen miles across and has an average depth of a mile. Grand Canyon was made a national park in 1919.—Union Pacific Railroad Photo.

Newell Heights

Rain looked quite promising this Tuesday evening for a while. This new country needs some quite badly not only to help the crops grow but to dampen down some of the dust so that land owners can keep what they own and not be trading. Mr. Z. Walker who is trying very hard to get his 160 acres wet for the first time has eleven irrigators.

Several of the mothers from here were guests at the Kingman Kolony school house Thursday afternoon when they were so nicely entertained by the pupils in the two rooms.

BUILD YOUR HOME with RENT RECEIPTS

Let the Building Bug Bite You!

The Boise Payette Way!

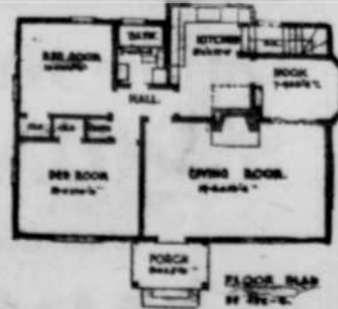

It doesn't take much figuring to see that you can build a home with the money you now pay out in rent. In other words, you can build your home for nothing! Sounds impossible, doesn't it?

Well, then, listen to this:

You pay rent in return for shelter and comfort. You may or may not remain in the same house, but assume that you do. At the end of ten . . . fifteen . . . twenty years, what have you to show for those years of rent paying? A bunch of rent receipts, if you kept all of them.

But suppose you had built your own home and those rent receipts were receipts in payment on the mortgage. At the end of the same length of time, what would THOSE receipts represent? A clear title to your OWN HOME! And no more rent to pay!

Kiln-Dried and Seasoned FRAMING LUMBER
Makes Better Construction

That's because seasoned lumber doesn't shrink or warp excessively after it's nailed in place in your home. Green lumber does . . . with resulting inconvenience and repair bills.

To be SURE of getting SEASONED Lumber, always specify 4-SQUARE Lumber. 4-SQUARE is the lumber that produces better construction at lower final cost. 4-SQUARE has squared ends for faster construction; exact lengths for less waste and closer estimates; and the trademark, "Weyerhaeuser 4-SQUARE" stamped on the end of every piece to guarantee the quality.
