Why a Car Needs Lubrication

Here are some things to think about while lubricating an automobile. The figures were taken from the publication "The Delaware Motorist," and show that, when an automobile has traveled 1000 miles, its moving parts have performed about like this:

The crankshaft has made 3,000,000 revolutions.

The camshaft has revolved 1,500,000 times. Each valve has opened and closed 1,500,000
