Three Vacancies To Be Filled At Navy School

Word has been received from Walter M. Pierce, Congressman from the 2nd district, that there will be three vacancies for midshipmen at Annapolis beginning July 1, 1938. This is an unusual educational opportunity and Representative Pierce wants the news brought to the attention of all boys who have successfully completed four years of high school and are facing the problem of college education.

The principal purpose of Annapolis is the training of officers for the Navy, but it is not essential that graduates should make this a career except when called upon by the Nation in times of necessity. Each student is given \$780 a year from the date of admission until graduation from the four-year course.

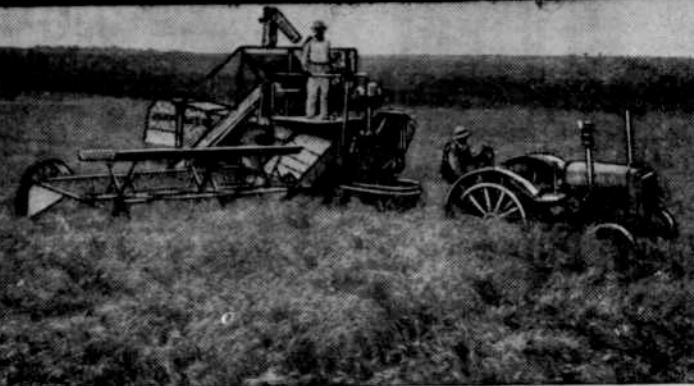

Applicants must not be less than sixteen nor more than twenty years of age and must be boys in fine physical condition, especially as to eyesight. Only those in upper ranks

Rival reporters, such as Gene Raymond and Ann Southern in "There Goes My Girl," do not usually inspect each other's stories, as in the scene above. But in this RKO Radio picture, in which these two popular players are again co-starred, the proceeding is understandable—for they are in love, and Ann is typing what she fondly believes to be her last story for her newspaper, just before quitting it for ever to marry Gene. How reporters' plans sometimes are thwarted is the burden of this fast-paced and lively comedy romance—which has a mystery melodrama thrown in for good measure!

of high school students could pass the examination.

Rep. Pierce will ask the Civil Service to give examinations in October this year. From the list they establish, he will select one principal and three alternates for each one of the three vacancies in this district. The three successful candidates will be required to pass an academy examination in February or April of 1938. Boys who are interested should write Rep. Pierce at Washington D. C. for circular of regulations, which also includes sample examinations.

RECIPE FOR A MODERN KITCHEN

I. ELECTRIC RANGE

... 21,845 Homes We Serve Agree!

The strongest proof of the real value of electric cooking is the fact that 47% of the homes we serve have chosen it. Not alone because it's modern—but too because low electric rates make it cheap. These 21,845 housewives have proved for themselves that it's convenient. that it saves work, that it gives

them more opportunities to be homemakers instead of housewives. Do you cook electrically? Ask your neighbor about it—discover why so many women will cook no other way.
