U. S. NATIONAL
REPORTS INCREASE
IN THEIR LOANS

Continued growth and increased activities of the United States National Bank are indicated by its latest published statement, as of June 30 1937. Deposits of \$115,626,078.85 indicate a growth of over ten million dollars since the corresponding date of a year ago. Resources increased approximately eleven millions, to a total of \$125,549,819.46. The Capital structure was also enlarged by over a million dollars, to a total of \$9,502,114.27, and Loans Discounts increased almost six millions, to a total of \$26,839,502.68.

"Not only is the gain in deposits a noteworthy indication of betterment of conditions," said Herbert W. Lenz, Manager, Ontario Branch, "but the increase in loans of more than twenty-five per cent shows a healthy demand for money with which to carry on in business and agriculture. The growth of business here at the local Branch is in proportion to that of the Bank as a whole."
