Vital Vitamins
The Four Important Vitamins **A, B₁, B₂, G and D**
Are necessary for the maintenance of health and vigor. Although they are present in natural foods, the average diet is often lacking in one or more of these vital factors. The common diet usually selected offers no definite assurance of an adequate vitamin intake. In fact they may be reduced or destroyed by the methods of cooking generally practiced.
Vitamin capsules, biologically standardized, may be obtained at our store and now is the time to start building a higher vitamin reserve for fall and winter seasons. We have a complete stock for your convenience.
