It's the **"BOTTOM STEP"** that Gives You the Most in Comfort and Convenience

Your electric rates—among the cheapest in the United States—step down as you use more electric service. The last quantity comes to you at the cheapest rate of all.

If you're like most of our customers, you've had electric lights and many of the small appliances—toaster, vacuum cleaner, radio—for many years. Then perhaps you've added electric refrigeration, electric cooking, electric water heating.

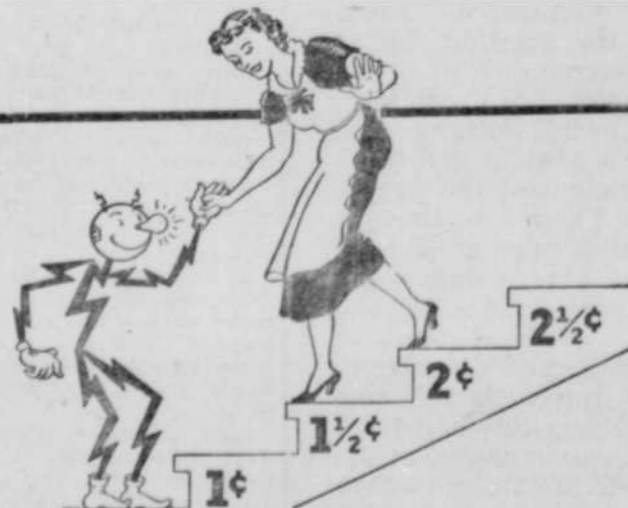

As you added each of these appliances, they automatically lowered the average rate you pay under "Step Down" rates. Your bargain got better as you used more.

And so—if you stop using an appliance temporarily, you lose the best part of your bargain. You cut off the lowest and cheapest "step" of your rates—you raise the average rate you pay for all service.

Keep the bargain of your low electric service. Use it freely. It's one of the few necessities of life that is cheaper the more you use.

After You've **"STEPPED DOWN"** Your Electric Rate **DON'T STEP BACK**

Your electric rate becomes cheaper as you use more electric service.

**IDAHO POWER**  
Electricity Does So MUCH—Costs So LITTLE!
