WE WILL FIGHT TWO ENEMIES

WITH the present war in Europe following the pattern of the one of 1914, plus a few extra countries being invaded by the Germans, it might be well for Americans to begin to take an added interest in a few things here at home.

We have monkeyed around now for six months and are nowhere near getting started on a proper increase in the number of men in our army and our navy is, compared with others, woefully weak. Both of these shortcomnigs will be "chickens coming home to roost", if our statesmen insist on throwing verbal brickbats at those countries in Europe who still believe that might is right. We were totally unprepared in the last war and we will be in the same fix again when we go into this one, and from the tone of the present leaders of our government in Washington we will eventually get into it.

However, when we get into this war we are not going to have just one enemy to fight, we are going to have two—that famous fifth column, "the borers from within". You think it can't happen here? How about a few facts—right in our own county this writer knows of a man who is one of the staunchest supporters of the Russian system of government that you will find—he believes in government ownership of everything (except of course, his own farm). And this same individual is what you might call a "key man" in one of the many Washington bureaus. This individual is but an infinitesmal part of growing cancer in this country, a cancer built upon small fry politicians that see in the overthrow of the ORIGINAL form of the American government, a chance to put themselves up as little dictators. This form of tripe would sell their souls for the chance to reach their goal, no matter under what form of government.

Then there is another case we can point to in which we sat in a meeting and heard our army official roundly criticized as spreading war propaganda through the observance of Army Day. Our contention is that there never has been and never will be an officer in the United States armed forces that will allow himself or any other member of the forces spread war propaganda—for it is the soldier's business to have first hand knowledge of the horrors of war. But our Army and Navy officers have a right, and a duty, to keep us informed as to what is needed to keep our armed defense the equal of any in the world.

Harry Bridges, who has done more than any other one man to stir up industrial strife on the Pacific coast, is still in the country, through the reluctance to deport him of a Secretary of Labor who has helped defeat every effort to get this alien out of the country.

In every place, both high and low, will be found members of this fifth column. That is what beat Norway, it is helping to do the same in Holland, a country notorious for its liberalism and Belgium has not escaped the ravages of traitors within its own borders.

Of course we cannot go out as a government and shoot these fifth columnists down, (it's against our guarantees), but we can as individuals advocate that they either shut up or go to the protection of the form of government that they are forever advocating—we can as individuals ask our government to get down to brass tacks and get our national defenses up to the equal of any in the world, and to do it now!

To: The Members Of The Democratic Party In Malheur County

Dear Voter:

Because I am a candidate for the nomination on your ticket to the office of County Assessor, I write this.

First, let me say; I would not have filed had the present holder of the office not told me he was not going to run; that it was all right with him to make the race; then it was too late for me to withdraw when I heard he had changed his mind and had really entered, but being in, I decided to make the best of it.

Many of you know me. I came here over 27 years ago and have spent most of the time since here in the County. I had a good education and have added to it by reading and studying. I have always been interested in economic problems relating to Taxation as anyone who has known me throughout the years will testify; and I feel that I have a fairly good knowledge of the same.

I spent quite a time in the bee business when honey was a good price; and I have been around farms, stores, camps, hotels, etc., but for the past few years I have been occupied with the Fire Insurance and Real Estate. I am a Registered Real Estate Dealer as the result of a State Examination which I took, and I have made a study of Farm and Town properties in connection with same. Besides, I was a Field Deputy Assessor a few times under the former County Assessor and the present one; and I am well-acquainted with most of the County.

If nominated and elected, I would devote most of my time to working in the field. I think I could get along with fewer Field Deputies and save a little money as a result. I would also try during my term of office to see all the assessed Real property in the County, so that I would be able to consider same when assessing more intelligently and to make valuations accordingly. I believe in reasonable equitable assessments, not in unreasonable inequitable ones.

I would have no other interest but my duties and I would work hard all the time to make you a good County Assessor.

Yours sincerely,

JAMES V. GRAHAM
