A SYMBOL OF LIBERTY

TOMORROW, Friday, June 14, is National Flag Day, a day on which every true American will display the American flag, a symbol of Liberty.

On this day we should give thought to what our flag stands for. Under its glorious folds we are free—free to speak our minds—free to observe our different religions.

This freedom is not confined to any class, creed or color—it is for all to enjoy, for we share our rights with others. No limit is set on a man's opportunities or achievements, each can realize his ambition according to the effort that he puts into it.

This freedom was not given to us—it was bought with the blood, and later sweat, of our forefathers—a freedom hard fought for and won. It is upon our shoulders, to see that, that freedom is safeguarded, by weeding out the alien who would weaken this nation by subversive action, by showing up the pussyfooting pacifist who would sell America out, rather than bear arms in a war in which this nation may have to enter to protect our homes and the lives of our women and children. And only through sacrifice on the part of all able-bodied men and women of this nation shall we be able to hold the Stars and Stripes up at the topmast, as a Symbol of Liberty!

UNITED FOR DEFENSE

THE present program of the U. S. for national defense, envisions the largest peacetime military expenditures in our history. Over a period of a few years, spending for defense is to be progressively increased, and the total will run far into the billions.

There can be no question for our need for the world's greatest defense system. But it will be a disastrous mistake if we adopt a hysterical, "Never mind the cost" attitude. Some of the billions for defense must be secured by reducing or eliminating the appropriations for other, less important government activities.

All the energies of this great country must be directed towards making it secure from invasion. To release those energies requires re-dedicating this nation to the ideals envisioned by the Founding Fathers.

High-sounding phrases aren't enough. Preparation against the possibility of invasion is a grim and costly business. Never in the history of our country was it so important for government to cooperate with individual enterprise or for individual enterprise to cooperate with government. Never was it so important to eliminate waste in government, in individual enterprise and in family life, in order to perpetuate liberty and opportunity.

THE MODERN APPROACH

THERE is no question about it, times are changing in farm practices the same as in every other line of endeavor. No longer is it possible to travel the same path followed by grandpappy and insure yourself of success. Someone along the way has changed the road and it's a rocky road to success along the old path.

By this we don't mean that all tried and true formulas should be thrown overboard. The fundamentals of hard work, honesty, thrift and industry are just as true today as they ever were, but there is more science and skill in every line of endeavor these days, including farming.

Thousands of young boys and girls have

had the benefit of 4-H club training and Future Farmer courses; and are more prosperous and better citizens today because of this training. Now we have a comparatively new development starting, called the National Farm Youth Foundation, where farm training is given right at home, under actual conditions, as well as learning the fundamentals and technique of farm engineering through a large extension university.
