UNUSUALLY TOUGH and HUSKY UNBELIEVABLY LIGHT to PULL

Here's a harrow that you have to see in action to appreciate fully. It follows behind your tractor or offsets to left or right for close work around fences and in orchards... heavy enough to penetrate hard ground deeply, husky and tough to stand up under unusually hard heavy work. If you have ever had harrow trouble and want a machine that rolls tightly along on roller bearings while turning under cover crops, mulching, killing weeds, pulverizing, preparing seed beds, or deep discing, let us show you this new Oliver Roller Bearing Offset Harrow. Ask to see it the next time you are in town. It's far and away the finest thing in the harrow line that we've ever seen in this territory and it's Oliver quality through and through.
