THE OLIVER ROLL-OVER SPRING TOOTH HARROW CLEANS ITS OWN TEETH

The Oliver Roll-Over Spring Tooth Harrow ends the one trouble with spring tooth harrows in this territory—clogged teeth. This job which used to make you mad and waste your time is all over—when you use the Oliver Roll-Over.

All you have to do is to pull the trip rope, without leaving the tractor seat. The Roll-Over rolls over and the teeth clean themselves of trash and weeds. Another pull on the rope and they go back to work.

Also you can just leave the teeth in the up position and haul the Oliver Roll-Over anywhere on the skids at the back.

This is one of the slickest tools ever invented. You'll want to know more about it. It is a great tool for control of quack grass or any other weed you want to get rid of. Come in and let us tell you about it.
