Presto! from PETROLEUM to SILK

Your eyes don't deceive you. For that lustrous lingerie the lady can thank an oil well!

First, at the "University of Petroleum" (Shell's \$3,500,000 research laboratories) they performed a miracle with petroleum molecules . . . and got a product used in making filaments for artificial silk.

Through similar chemical acrobatics, the "University of Petroleum" has found a potentially unlimited supply of glycerine, synthetic rubber, and T. N. T.

This uncanny knowledge of petroleum is what you buy, "by the gallon," at Shell pumps!

New Solutized SHELL is the finer fuel for '41

TWO SCIENTIFIC FACTORS advance the Road Performance Rating of new Shell Gasoline to an all-time high:

1. It is refined with the Solutizer Process (originated by Shell's research laboratories, Patent No. 2,149,379). This steps up performance by removing the "pro-knock mercaptans."
2. Thermal conversion makes it rich in iso-compounds similar to iso-octane—first produced commercially by Shell scientists to make practical 100-octane aviation gasoline . . . fuel so powerful that it led to an increase up to 30% in the speed and flying range of planes!

These two factors save on your costliest driving—Stop-and-Go. And add a new thrill to motoring. Your Shell dealer has new Solutized Shell (at regular price) and Shell Premium—try a tankful today!
