THEY FOUND 90 extra miles an hour IN A DROP OF OIL

In a drop of crude oil, scientists at the "University of Petroleum" (Shell's \$3,500,000 research laboratories) see a universe of possibilities—wonders already realized and greater miracles yet to come. They discovered how to produce iso-octane, on a commercial scale, from a waste petroleum gas. This was the key to 100-octane fuel for aviation which led to an increase up to 30% in the speed and flying range of planes!

YOU GET THIS RESEARCH "BY THE GALLON" IN NEW Solutized SHELL

Synthetic rubber—glycerine—plastics—fertilizers—germicides—even T. N. T.—are among the many achievements of the 821 research scientists and assistants at the "University of Petroleum." Now they've advanced the Road Performance Rating of Shell Gasoline to an all-time high:

1. It is refined with the Solutizer Process (Patent No. 2,149,379). This steps up performance by removing the "pro-knock mercaptans" which have always been a drag on performance.

2. Thermal conversion makes it extra rich in iso-compounds similar to those in aviation gasoline.

These two factors save on your costliest driving—Stop-and-Go. And they add a new thrill to motoring! Your Shell dealer has new Solutized Shell (at regular price) and Shell Premium—try it.
