HOW \$23 MONTH BUILDS A HOME

Let the Building Bug Bite You

Not a mansion, but a well-planned home that provides for future expansion. Ideal for a young couple just starting out, or an older pair whose children have grown up. Note first of all that the arrangement provides for duplicating the bedroom by merely adding a room on the other side of the bath. The hall would connect both. The living room is large, the kitchen compact and the dinette convenient. While this plan has no basement, one could be included for small additional cost. In most cases, ownership of a lot is sufficient equity to swing the deal, and the monthly payment includes all charges... interest, taxes, insurance and regular reduction of the principal. This home was planned by Boise Payette home designers. Let them plan one to fit YOUR needs and YOUR budget!

WOMEN... AND ARITHMETIC

WHICH are really better at household arithmetic—men or women? Let's look at the question in terms of insurance. What woman would carry only \$1,000 in fire insurance on furniture, clothing, etc., when it would cost several times as much to replace them? What woman does not know what a financial burden would fall on her if her husband were injured in an accident? Yet many a man overlooks these vital needs.

So here's a practical suggestion to husbands and wives. Don't guess about insurance... consult this agency for expert advice on which policies to buy—how much—and what to do in event of loss.
