Self-medication is dangerous

The human body is the most complicated mechanism ever created. Not all of its processes are thoroughly understood even by those who devote their lives to a study of them. It is not surprising, therefore, that persons without medical training who attempt to diagnose and prescribe for their own serious ills often do themselves irreparable damage. Have respect for your body. You can never get another. When illness comes consult a physician... a licensed M.D. He is a specialist in his line just as we are in the business of filling his prescriptions.
