"INCLUDE BEANS IN YOUR MAIN DISHES"

Dried beans don't come in cans so we don't need to worry about them being rationed for a while at least and they are an excellent source of protein. They will take the place of a main dish of meat on our meatless days, as well as to cut down the weekly family food budget.

get. They can be used as a dish alone or served with meat to extend the meat to its limit. Peas, lentils, nuts, and legumes are also meat substitutes and should be served often with your family meals.

When we think of just plain beans we wonder why our mouths don't water and why we don't have an appetite for our meal but when we see them garnished and served with sauces, in Chili, with other trimmings, and with meat, we wonder why we had to wait for the meat rationing program to come along to become conscious of the good flavors of the simple bean.

Beanie Weenies
8 frankfurters
2 cups cooked navy beans
1 onion, sliced
1 can condensed tomato soup
1 tsp. salt
1/4 tsp. pepper
1/4 tsp. mustard
1 tsp. Worcestershire sauce

Split frankfurters lengthwise and cut each piece in half. Place a layer of cooked beans in an oiled casserole, then half of the frankfurters and top with remaining beans, onion slices and frankfurters. Mix the tomato soup with salt, pepper, mustard and Worcestershire sauce and pour over the casserole. Cover and bake in a moderate oven (375 degrees) for 25 minutes. The onions will still be crisp, but this gives a pleasant crunchiness to an otherwise soft texture. Serves 4 generously.

Baked Beans
1 lb. Navy beans
1 t. salt
2 T. molasses
4 T. sugar
1/2 lb. salt pork or bacon
4 cups water.

Wash beans thoroughly and pick over. Mix dry beans with all ingredients in Thrift Cooker kettle. Cover. Cook on low for from 8 to 12 hours or overnight. Note: Catsup or tomato juice may be used for one cup of liquid. To each additional pound of beans being cooked use only 2 cups of water.

Do you like Cheese dishes. I'll give you two next week.

At The National Capital

By John W. Kelly

Washington, D. C., Jan. 7. A rancher in Harney county made a mistake in applying for his "certificate of necessity" and asked for 40,000 gallons of gasoline. The strangest thing about it is that the bureau in Detroit authorized him to use 36,000 gallons. Others who did not

make an error have not fared so well. One cattle outfit asked for 18,000 gallons and was allowed 49,800; another asked for 13,000 and was given 5360; another asked 5000 gallons and received 2000; one settler who applied for only 500 gallons was cut to 150 gallons.

Unless, wrote the association of settlers in Harney county to the department of agriculture, farmers can get enough gas to carry on their operations Harney county will not be able to attain the food goals which have been set for that section.

Harney county is one of the "open spaces." The 400 farmers on the 6,500,000 acres produced this year 16,000,000 pounds of beef, 600,000 pounds of wool and almost 4,000,000 pounds of mutton. If these ranchers follow the suggestions of Wickard these figures must be increased by 10 percent in 1943, but this can be done only by providing sufficient gasoline. No dinky little farms are in Harney--they are robust affairs, 400 acres of cultivated land and 2400 acres of pasture; that is the average ranch. A books, given motorists, would provide only sufficient gas to enable a farmer to drive from the farmhouse to the mailbox three or four miles away.

Administrator Wickard is responsible for something else--reducing the ice cream wanted by the troops. At Camp White in Jackson county, the consumption of ice cream is 27,019 gallons and Wickard has reduced this supply to 5490. At Camp Adair the consumption is 18,812 gallons and the amount that can be sold is only 1334. And they said ice cream would not be rationed.

Chicken raisers of Oregon state that they will be able to produce the increase of eggs and poultry in 1943--if the government will see that they can buy the proper food. The demand, it appears, is for meat scrap from Argentine. The department of agriculture explains that owing to the scarcity of cargo carriers due to the activity of German submarines, no space is available for scrap meat at this time, although the subject is being studied. Chicken growers are advised to feed soy bean cake meal and cotton cake meal while the Argentine matter is under survey. At present the principal items brought from Argentine are leather and vegetable oils, which have been considered of greater importance in the war effort.

University of Oregon and Oregon State college will be on the program of army and navy to educate part of the 250,000 teen-age boys subject to draft. The intention is to give the lands a thorough military training along special lines and fit them to be officers. The schooling will be paid for by army and navy; students will be in uniform and live in barracks under army conditions. There may be 1000 or more of such students at each of these institutions.

Plans of the high command do not start with the teen-agers but with high school kids. A course of instruction in mechanics such as will fit them for ground crew work, greasing tanks and geeps, and the fundamentals of radio, is being prepared for the new school year. In this manner military authorities hope to give the school boys a pre-conditioning education which will speed up their fitness when they are old enough to be inducted into the service. Army will be actually

yaking over boys at the age of about 14--or whenever they enter high school.

Tillamook county creameries are asking for hay for their stock and the matter has been taken up with the department of agriculture. Charles Bowling, chief of transportation for the department, has been told that there are quantities of hay in Nevada but that freight rates are too high to bring it to Tillamook. An investigation is under way to see whether lower freight rates are possible.

Walter M. Pierce has requested the federal power commission to investigate the pooling of power by Bonneville and Grand Coulee with Eugene and the private companies. The former congressman says that by this pool government power is being sent to Idaho, Montana and Utah, where industries have been located, whereas these industries should have been located in Oregon

and Washington. Federal power commission has not indicated whether it will make the investigation.

From Mr and Mrs Lem Wilson, Jr.

I would appreciate the continued patronage of the former customers of Mr and Mrs Wilson.

Mrs. Dot Toombs**ISN'T HE WORTH IT?**

This message is written to you mothers--from your Government.

It concerns the most precious thing in all the world to you--your child.

It asks you to help protect that child--from fear, from starvation, from death--the fate that has befallen millions of children under the rule of Nazi and Jap tyrants.

It asks you to urge your husband to join the Pay-Roll Savings Plan--the easy way to buy War Bonds that will furnish the ships and guns and tanks and planes so desperately needed to guard you and yours from the horrors of defeat.

Or, if your husband is already buying War Bonds through the Pay-Roll Savings Plan--it asks you to urge him to buy more, to increase his savings to at least 10 percent of his salary or wages.

Remember, millions of your brothers, husbands, sons, friends are risking everything. You are asked to risk nothing. War Bonds are the world's safest investment.

As you buy them through the Pay-Roll Savings Plan--today, you are doing your

part to help protect your child today! And at the same time setting up a savings fund to help bring up, educate, and develop that child--tomorrow.

Talk it over with your husband tonight. And as you do, resolve to put at least 10 percent--not 6 percent or 7 percent or 8 percent--into War Bonds through the Pay-Roll Savings Plan. Do it for that child of yours. Isn't he worth it?

WHAT YOU SHOULD DO

If you are--

1. Already setting aside 10 percent of your pay for War Bonds through the Pay-Roll Savings Plan--boost that 10 percent if you can.
2. Working in a plant where the plan is installed but haven't signed up yet--sign up tomorrow.
3. Working in a plant where the Pay-Roll Savings Plan hasn't been installed, talk to your union head, foreman, or plant manager--and see if it can't be installed right away. The local bank will be glad to help.
4. Unable to get in on the Pay-Roll Savings Plan for any reason, go to your local bank. They will be glad to help you start a plan of your own.
