Every time we fill a prescription we keep this thought in mind. Two reputations and a life depend on how faithfully we follow instructions. The doctor's reputation, our own reputation, and the life of somebody's mother, father, sweetheart or child. Pharmacy is a profession built on faith. We're proud of the faith you have in us—we won't fail you.
Owyhee Drug Co.

Why are prescriptions often written in Latin?

Perhaps you have noticed that the prescriptions which your physician writes are usually written in Latin. No doubt you have wondered why. Prescriptions are written in Latin because Latin is a dead and never-changing language, universally employed in medical practice. A Latin prescription written in America or England can be filled in Germany, Russia, or France, even though the pharmacist may not know a word of English. On the other hand, no matter where your prescriptions may be written, we can fill them promptly and accurately. That is our specialty.
