## FOOD PRESENT Farm WAR NEWS

### GOOD NEWS FOR FEEDERS

Two developments last week give Oregon farmers assurance of adequate supplies of feed grains and moderate prices to help meet 1943 livestock and poultry goals. First, Commodity Credit corporation announced that its feed wheat sales would be continued on substantially the same basis as 1942, when about three million bushels of wheat were sold for feeding to livestock and poultry in the state. Second, OPA ceilings halted the upward spiral of corn prices.

**NEW PORK PRICES RULES**  
In a move to assure full use of pork supplies by civilians, armed forces and lend-lease, OPA on January 19 replaced packer and wholesale sellers' ceiling prices with new uniform regulations. Prices to the consumer will remain unchanged, since retail ceilings are not affected.

**TIRE CHECK-UP DEADLINE**  
Farm truck owners now have until February 28 to have truck tires inspected in compliance with ODT regulations.

**HERE'S FIRST FARM PLEDGE**  
First Oregon farmer to sign his 1943 farm plan for maximum war production was Paul Nelson, Benton county. Here's Paul's pledge of food for freedom contributions: Spring and fall litters from 10 brood sows, feed 150 hogs, a 100 per cent increase over 1942; sheep increased from 200 to 250 head; 200 laying hens and four milk cows, same as 1942; feed out and market 30 head of beef stock, same as 1942; 100 acres of feed grains—corn, barley and oats, to feed the stock; 6 acres of alfalfa hay, a new planting; 18 acres of English rye and 10 acres of Austrian peas for seed, and a big family garden. To pasture the stock, Nelson has 40 acres of tall

fecuses and 150 acres of woodland pasture. The family "team" that is tackling this production job is made up of Nelson and his wife, Hugh, age 11, and Nancy, 8.

### FARMS GET WAR RATIONS

Reclassification by local draft boards of farm operators and workers as essential under the "war units" plan is proceeding throughout the state. Individual farm "war ratings," as determined by the farm plans and work sheets for 1943 now being made for every farm, will be used by county war boards to assist local draft boards in completing the reclassification. The increasingly serious farm labor problem is getting a lot of attention in Washington these days. Secretary Wickard states that revision of the 16-unit essential for standard is being contemplated to insure that no skilled farm worker is taken from the farm.

Increase in county quotas of many items of farm machinery and equipment are in prospect as a result of WPB action to allocate more materials to machinery manufacturers. The county farm machinery rationing committee will be guided by information gathered in the current farm canvass to place these additional machines on the farms where they are most needed and will contribute the most to 1943 production.

### THE VARIETY MEATS

Let's consider the Variety Meats! Liver, heart, tongue, kidneys, sweetbreads, brains, and tripe are among the glandular meats which we should include in our menus now because, first, they are very rich sources of iron and the B vitamins and, second, they are not restricted and when Meat Rationing starts in earnest we are going to look to these for our protein supply for our family.

Liver is one of the richest food sources of Vitamin A. (Beef liver excels over calf's liver as a source of iron, and is more economical; pork liver, cheapest of all, is the richest source of iron.) Learn to cook liver without making it brittle and bitter. Serve liver once a week to your family. There are so many

### INSURANCE

It's all America's "Home Defense"

It's up to you, the farmers of America, to back up our soldiers—uniformed and civilian—by supplying the vital products that keep them going. And, of course, every American farm must remain "in the running".

Your farm and equipment should be adequately insured with frequent checkups for additional protection.
