Mrs. America Meets The War

Uncle Sam's call on the nation's linen closet for sheets and pillow cases for the armed forces has cut into the usual quantity left for Mrs. America's family. However, if housewives buy only what they need, there should be enough to go around, and bed linens will require usually good care to make them last. Incidentally, it will be easier to find sheets for double beds than the single sheets which are used by the armed forces and hospitals. Although there is no ban on the production of sheets with dainty blue or pink borders, they'll be hard to find for manufacturers are concentrating on standard sizes and all-white sheets.

Better take care of your bedspreads, for they're considered to be relatively non-essential in wartime. They're not being made in great quantity. Since cottons and rayons are needed for more essential uses, and the looms which were used formerly for bedspread fabrics now are turning out goods for military and essential civilian uses. However, it is estimated that there are enough bedspreads already made up plus the limited number being produced to take care of Mrs. America's needs for some time to come.

When you've had to wait for the corner drug store to receive supplies of film for your camera, perhaps you've never supposed that cotton lint plays a part in the story. For one thing, cotton lint has many essential wartime uses, one of the most essential being as an ingredient of explosives. But photographic film uses cotton lint, too, as its cellulose base. And here's another thought when your snapshots are delayed because of lack of film—army film requirements have increased more than ten times since the war. Likewise film footage is used in great quantity for aerial photography, medical x-ray, and industry which uses much x-ray film. Even the movie industry makes pictures with 25 percent less film. These facts help you understand why the nation's camera enthusiasts have received a 50 percent cut in the amount of film available for their hobby.

In many communities throughout the country Mrs. America will be given a chance to play another role in the battle of food besides helping on the farm, and that is volunteering for work in food processing plants. When the call comes in your community for helpers to get food canned, dehydrated or frozen, do your part for foods must be canned quickly, although the supply of labor has been depleted by war time conditions. Local officers of the United States Employment Service will handle recruiting for U. S. Crop Corps forces to work in canneries. Since housewives are after all the country's champion canners, officials are hoping that many American women will volunteer for this temporary work when the call comes.

If Mrs. America's teen-age son or daughter goes to work in a food processing plant during summer vacation, she's assured that it will be under the protection of the state and federal laws. Thus the health of the young worker will be safe guarded and at the same time plants will be assured more efficient work, fewer absences and accidents. All establishment engaged in canning, quick freezing, dehydrating, drying and packing fruits, vegetables and seafoods are subject to the child-labor provisions of the Fair Labor Standards act if they produce any goods for shipment in interstate commerce. If the state law establishes a higher standard than the federal law, the state law must be followed.

Before war-born shortages threatened any operations of Mrs. America's household, she took most gadgets and equipment for granted. But shortages bring to light the myriad details which made a household tick. For example, when squeezing oranges for breakfast fruit juice, most women probably are not aware of a change because of the war. The coating of shellac which used to cover oranges to prevent excessive shrinkage in transit is too precious and scarce for this purpose during wartime. So a wax coating has taken its place.

And here's food news. Mrs. America will be able to buy six types of canned fruits and vegetables from the 1943 pack—applesauce, blueberries, figs, beets, carrots, pumpkin and squash—that previously had been earmarked for government requirements only. However, the War Production Board has just released these canned goods into civilian channels. Except for asparagus and strawberries most frozen fruits and vegetables of the 1943 pack are expected to remain about the same in price. However, frozen asparagus will be increased about one cent a pound. And if Mrs. America should want frozen strawberries with cream, it will cost her three or four cents more per pound for berries processed in the 1943 pack.
