SELECTIVE SERVICE CHANGES
Occupational deferments generally will be denied 18 to 22-year-old registrants, other than those in agriculture, fathers and non-fathers alike, unless they are engaged in activities in which deferment is specifically authorized, according to Selective Service. Furthermore, all registrants will be given pre-induction physical examination at least 21 days before being inducted. Therefore, the period of three weeks in the enlisted reserve now granted by the Army and the one-week period granted by the Navy will be eliminated. These changes become effective February 1.

SOCIAL SECURITY FOR FARMERS

Social insurance for farm operators, farm workers, business and professional men, household workers, and employees of Governmental and non-profit organizations was recommended by the Social Security board in its eighth annual report. The board urged inclusion of these groups in an expanded Social Security Program which would include insurance against cost of medical and hospital care without distributing the present principle of free choice in selection of physicians or hospitals. The board recommended that a comprehensive social insurance system should be set up now while earnings are "at record levels" in order to have it in full operation for the postwar period.

TO STABILIZE RATION BUYING POWER

Under the new ration token plan an effective February 27, the household will be able to buy about the same amount of rationed processed foods and meats-fats as she can now. Point values will be adjusted so the individual's allotment of 60 points for buying meats and fats will buy the same amount as the present allotment of approximately 64 points. Similarly, under the token plan the 50-point allotment for processed foods will buy an amount equal to the present 48-point allotment.

PRE-WAR BABY CARRIAGES BACK

Pre-war model baby carriages, strollers, walkers, and push carts will re-appear on the market in about six weeks, according to the WPB. Greater availability of steel makes possible the production of these pre-war models.

ASK FARMERS' HELP IN WOODS

To mobilize farmers on farm woodlands and for work in forest industries, the War Production Board, War Food Administration, and War Manpower Commission have combined forces. Farmers and farm workers are asked to devote their spare time, particularly during the slack winter-spring period, to work in the woods and woods industries. Production of 14 million cords of domestic pulpwood will be necessary in 1944 to supply the needs of our Armed Forces overseas and meet essential home front war requirements, according to WPB's paper division. Farmers have nearly 139 million acres of farm woods which annually produce about one-third of all forest products and 38 percent of the Country's pulpwood.

MORE FOOD FOR SCHOOL LUNCHES

America's school children have been assured by the Office of Price Administration more generous amounts of food for lunchroom and cafeteria meals under a new plan for providing rationed food to schools. The new allotments were worked out by OPA in close cooperation with school lunch and nutrition experts of the Food Distribution Administration. The Government's school lunch program, which went into effect one year ago, is a wartime measure to make sure that school children will have a well-planned and nutritionally adequate noon meal.

ADVICE FOR SOLDIERS OVERSEAS

When writing to soldiers overseas, particularly those in the tropics, home folks may help contribute to their health, say the War Department, by reminding those overseas men of the necessity of following the advice of their medical officers.

TRACTOR PRODUCTION UP

Production of wheeled tractors in December was the largest for any month in two years in excess of 20,000 as compared with 4,200 in December, 1942. However according to the WPB, the current rate of production must be maintained in order to meet the tractor quota of 209,000 for the 12 months that will end June 30. This will not be easy because many of the parts needed for tractor production are also used

of the lend-lease program in March of 1941. Three categories of food are in commercial storage today—the largest being privately owned and destined for distribution to civilians. The second category consists of stocks owned by the military force for which detailed date are not made public. The third includes stocks stored by the food distribution administration for the WFA. These stocks are used for lend-lease purposes and for emergency use by the military.

CONTAINER SHORTAGE WARNING

It will be necessary for used wooden containers to fill a 10 to 20 percent gap this year if 1944 crop yields are normal, the war food administration advises. Container salvage will be of great importance to fruit and vegetable growers and handlers. The outlook also is dark for egg crates of all kinds, meat packing boxes, open mesh bags and similar containers. The shortage of wooden containers is due to a general scarcity of commercial wood and lumber products and to the fact that use of lumber for packaging and shipping has increased over 300 per cent since the war started.

SLAUGHTER RECORDS

Total 1943 slaughter of cattle, calves, hogs, sheep and lambs set an all-time record for one year at 103,721,000 which topped the record set in 1942 by about 10,000,000 head. During December, 7,566,816 hogs were slaughtered in the United States to set an all-time record for any month. New December slaughter records also were set for cattle, calves, sheep and lambs. There were 1,190,853 cattle slaughtered, 538,775 calves, and 2,257,936 sheep and lambs. These are national figures—total Oregon slaughter is reported to be down.

PROTEIN MEAL DISTRIBUTION

Directed distribution by the war food administration of oilseed meal from the January allocation has been made on the basis of requirements after taking into account the amounts distributed by the trade. Oregon's allocation of 2000 ton is being distributed by the state feed requirements committee to mixers, dealers and feeders on the basis of previous use. The state AAA committee emphasized that the state allocation represents only about a fifth of the total requirements, and stresses that dealers, mixers and feeders should persist in attempting to obtain their needs through the trade, which owns and distributes 80 per cent of the oilseed meal.

AN ORDER HAS BEEN ISSUED COVERING

February production similar to the order requiring processors to set aside 20 percent of the January production for directed distribution by WFA. No information has been received as to Oregon's February allocation.

CANADIAN WHEAT

The war food administration has obtained a priority on 200 boxcars a day to transport wheat from the

western provinces of Canada into the United States. Such a movement should bring 40 million bushels into this country during the next four months. During 1943, approximately 185 million bushels of grain were transported over the great Lakes to U. S. ports. It is planned to step up this movement to 285 million bushels in 1944.
