Congratulations

To The Farmers of Malheur County

You have done a Wonderful Job! You have broken all records by producing an 18 million dollar crop of Food. You have done this in spite of the greatest shortage of labor and farm equipment we have ever known.

This record breaking crop was not produced by your bare hands alone. Tractors and modern equipment backed up with repair parts and service from your Service Dealers has played an important part in your achievement.

As your Case Implement Dealer we are proud to be associated with you. We are thankful that it has been our privilege to serve you and we hope to continue to do so in the future.

We hope the new year brings you success and above all else—"PEACE ON EARTH".

The high cost of living

The low price of electricity

Look at the cost of living—up 25.4% since 1939.* Or would you rather not?

Then look at the cost of electricity—down 3.2% during the same period! * Feel better?

Of course, the reduction is a nation-wide average, and partly due to increased usage, which earns lower rates. But it continues a long-time trend.

In fact, the average American family gets about twice as much electricity for its money today as it did 15 years ago!

(So why isn't your bill cut in half? Because you have more electric servants now. Kilowatt-hours are much cheaper—but you're using a lot more of 'em!)

Will you pardon us a moment while we point with pride to our wartime record? Production up—price down—no rationing—no shortages.

Thanks to far-sighted business management, every war plant making weapons has had plenty of electric power. And so will every peacetime factory making jobs!
