

PICKING UP FAWN DEER IS ILLEGAL

The Oregon state game commission makes its annual request that sympathetic individuals refrain from picking up fawn deer that appear to be deserted. In most instances this is not true and if the fawn is left alone, its mother will eventually return to claim it.

"Deliberate picking up of fawns in order to obtain a pet is against the law and a permit is not issued to keep it unless it can be proved that the fawn actually was deserted and would have died," officials said.

"While young deer may be attractive pets, as they grow older they can become burdensome to care for and often dangerous to human life if adequate facilities are not provided. In the end, the deer may have to be killed as most of them cannot be satisfactorily released after being raised in captivity."
