The Nu-Acres Grange sponsored a potluck supper on the lawn at the Harry Wood home Thursday evening. Fifteen families enjoyed the affair.

Dick Hawley was host last Friday.

FREE CLINIC FOR HARD OF HEARING

E. M. Hollenbeck at Owyhee Hotel Friday, June 28

E. M. Hollenbeck, expert Acoustician, will be in Nyssa Friday, June 28 to offer free diagnosis to people who are hard of hearing, at the Owyhee Hotel, from 10 a. m. to 6 p. m.

Hollenbeck will employ the new Acousticon "speech-hearing test" in diagnosing the various conditions of deafness which confront him. This test, he said, is based upon the latest scientific research in the field of sound, and has been perfected during the war years.

"New Hearing Lenses" Here!

"One of the most amazing scientific discoveries made during the war," said Hollenbeck, "resulted in a development called 'Hearing Lenses'—actual lenses which may be fitted to the ear just like glasses are fitted to the eyes, to correct the particular type of defective hearing in each individual."

Hollenbeck will offer a free demonstration of these new "lenses" during his clinic. He pointed out that they are now available for practical use, having been developed by America's oldest manufacturer of hearing aids, the Acousticon company. Their most recent use has been perfected in the new Acousticon "Super-Power" Unipac.

It was emphasized that Hollenbeck's demonstrations and hearing tests demand absolutely no obligation on the part of people who attend. He also suggested that those unable to come to the Owyhee Hotel may phone him at 114, Nyssa, and that he would provide private appointments at individual homes of as many as possible.

1916 30 Years of Farm Electrification

Electricity and Agriculture Go Hand in Hand in the Snake River Valley

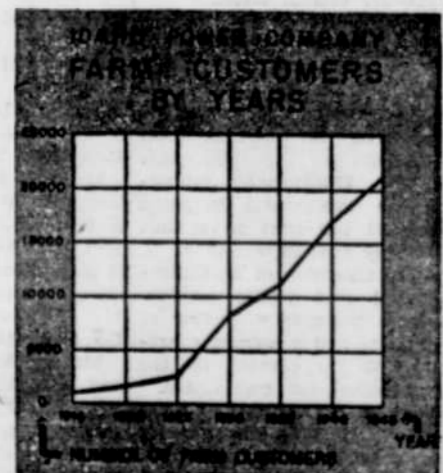

It was 30 years ago this summer when Idaho Power Company commenced its program of farm electrification. Interrupted by the first World War, the building of lines was resumed during the twenties. Even the depression of the 1930's did not halt this work.

During the recent wartime the extension of farm electrification was limited in accordance with conservation rules, but many farms received electricity at that time to assist in the vital production of foods.

Today Idaho Power Company serves over 90 per cent of all farms in its service area, and is utilizing available manpower and materials to finish the job.

The company assumed the responsibility, thirty years ago, of supplying all the electric needs of its territory, both in towns and on farms. The chart shows how consistently we have increased our service to farm customers.

Farm customers served by Idaho Power Company enjoy the same low rates as town and city domestic customers—and taxes paid on our 5547 miles of rural lines are a major contribution to school districts and other branches of local, state and federal government.

Idaho Power is a Leader in Farm Electrification
