AAA NEWS

QUOTAS, ALLOTMENTS OFF

Formal announcement that there will be no wheat marketing quotas and no acreage allotments during 1947-48 wheat production and marketing season was issued last week. The agricultural adjustment act of 1938 provides for marketing quotas when the total wheat supply exceeds normal year's domestic consumption and exports by more than 35 per cent, protecting both consumer and producers by maintaining adequate supplies of food. Normal year's domestic consumption and exports, plus 35 per cent is calculated at 1,239,000 bushels. It is expected that 1947-48 wheat supply (crop plus carryover) will be less than this figure.

WHEAT BIN EMPTIES

American wheat farmers came within a broom-whisker of sweeping their bins absolutely clean in

response to the famine crisis. July 1 stocks of old wheat on U. S. farms were only 3.8 per cent of 1945 production compared with a 10-year average of 10.6 per cent for that date, USDA reports. A year ago the 8.3 per cent of the crop was still on farms at year's end. The 42.7 million bushels reserve on July 1 was the smallest since 1937. Disappearance of 161 million bushels between April 1 and June 30 set a record.

SALE REQUIREMENT ENDED

Set-aside provisions requiring farmers in 24 states, including Oregon, to sell at once half of the wheat they delivered to country elevators was terminated July 16. The amendment was put into effect in May to obtain 250 million bushels of wheat for export from the current crop. It was suspended July 1, when price controls expired.

FARMS TO RANK HIGH

The enlarged farm market for the goods of industry should play an important part in bolstering the nation's post-war economy, the department of commerce says in its publication to "Current Business." Emphasizing the close economic inter-dependence between farming and business communities, the publication points out that no sustained prosperity can be obtained unless both prosper. High war-time earnings of American labor enabled millions of persons to enjoy for the first time something like an adequate diet and satisfactory dress, the survey continued. The \$10,000,000,000 backlog of cash and securities in farmers hands and the 200 per cent increase in farm income during war-time. The

eventual size of the post-war market among farmers will depend in part whether farm savings go into purchase of goods or are diverted into farm property speculation. Farm prosperity should continue well into 1948, but after that there is no assurance that the old farm problem—lack of adequate markets and hidden farm employment—may not again appear, the department of commerce said. The best insurance of continued farm prosperity lies in an adequate number of jobs in business and industry with continued business prosperity and high level of wages so people can continue to buy farm products.

Folks keep asking about those new Chevron signs

And those questions are music to our ears—because we want you to know all about 'em. You see, lots of people appreciate the careful, friendly service they get at independent stations but they don't always know they are "home-owned." So those new Chevron Signs and the distinctive burgundy, cream and green paint jobs on our stations mean that we're independent business-men in the community.

It's mighty important to us that our customers get the finest—so you can be sure we'll continue to handle products like Chevron Supreme Gasoline and RPM Motor Oil. Our services and accessories will be the same high quality, too. Chevron Gas Stations will always honor Standard of California's Chevron National Credit Cards, too. If you haven't applied for one yet, we'll be glad to take your application.

REMEMBER...the same products, the same service, the same folks to serve you
