

Arcadia

Mr. and Mrs. Sam Kenney of Ontario and Mr. and Mrs. Bill Shoemaker visited at the Theo Matherly home Friday evening.

Mrs. Winnie Doner of Nampa spent last week with her daughter, Mrs. Fay Corn, and family.

Mrs. Vern Butler and children spent the week-end at their cabin at McCall.

Miss Genevieve and Marion Hipp of Nyssa visited at the Theo Matherly home Tuesday evening.

Mr. and Mrs. Gene Kipp held a weiner roast on their lawn Thursday evening. Guests were Mr. and Mrs. Hugh Lamb and Mr. and Mrs. Paul Stevson.

Miss Belvah Corn went to Nampa this week to spend a week with her grand parents, Mr. and Mrs. Will

Corn, and other relatives at Nampa and Caldwell.

Misses Clarabel Wright, Ola Benson and Bernice Ree of Boise spent the week-end with Mr. and Mrs. George Moeller and family.

Mr. and Mrs. John Zittercob and Mrs. Anna Dail went to McCall for a few days' vacation.

Mr. and Mrs. Otis Bullard and family, Mr. and Mrs. George Moeller and family and Mrs. Ellis Warner and Rose and Alice went to Ontario Sunday evening to hear the Ambassador Quartet from the Multnomah School of the Bible Portland.

Those from Arcadia Sunday School who will attend the American Union Sunday School Bible Conference at Quaker hill at McCall from August 6 to 13 are Wilma and Betty Bullard, Rose and Alice Warner and Patty Dowers.

Beatle Lay of Redmond, Oregon spent the week-end here with his parents, Mr. and Mrs. Olin Lay.

Dick Groot went to the sale at Ontario Tuesday.

Mr. and Mrs. Ernest Hawkins and family of Harper were Sunday visitors at the home of Dave Hawkins.

C. M. Tensen was home from Summit prairie Friday to attend to business.

Farmers in this community are threshing and combining their grain.

Mrs. T. H. Beranick, who has been visiting her daughter, Mrs. Clayton Jensen, returned to her home last week.

Mrs. Dick Stam of Oregon Trail entertained Sunday for the following guests: Mr. and Mrs. Gerrit Groot of Apple valley, Mr. and Mrs. Pete Tensen, Mr. and Mrs. John Timmerman of Newell heights, Mr. and Mrs. Dick Groot and Mr. and Mrs. Z. Davidson of Parma.

Ontario visitors Saturday were Mrs. Edward C. Larson and family.

their best and then think—shouldn't this be definitely made someone's business to see that this life giving aid should be found in readiness every minute? Should some one be trained to know how to set it up and run it properly after it is set in motion? We live in a land where tragedies are happening every year. Childrer, drowning in ditches and ponds. Someone must be responsible for the respirator and also someone should be well trained in giving first aid and artificial respiration to go along with it. It would only take three men even for a populace as big as ours—one to be responsible for the transportation and aid of any kind, one for the respirator and one to give the first aid and artificial respiration.

We have now had three drownings and three near drownings in what is a short period of time. I think such a team should be sponsored by some worthy organization and see that the job is carried out. If any member of the team can't function at any time a capable substitute should be put in at once. Think it over. The next tragedy might be yours.

Respectfully,
Mrs. L. E. Robbins

Letter To The Editor

To whom it Might Concern
"What is everyone's business is no one's business." How truly this has applied to an incident which has happened in our community this week. We had a double tragedy—two drownings of babes, who innocently waded into what looked like a puddle of water.

They were missed, frantically searched for and removed from the water. Help was summoned. Police came; Ontario came; Nyssa came.

Ontario arrived first and all that was possible was being done for the first boy. Then Nyssa came. What a relief for the grief stricken parents. Both boys could now be helped.

Everything after pondering was in readiness, but Nyssa's respirator was out of oxygen. Add this to the remorse of the parents and the deep chagrin of the men from Nyssa who were endeavoring to do

UNION PACIFIC IS LAYING NEW TRACK

Omaha, Neb., July 16—The relaying of 350 miles of track in parts of six of the 11 states served by the Union Pacific railroad is being done this year at a cost of \$7,500,000, according to an announcement made here today by officials of the railroad.

About 89 miles of track have been relaid in Nebraska with further work scheduled to begin in September. The Nebraska project calls for 165 miles of track ranging from Ames to Sidney at a cost of \$3,500,000.

Now in progress is the relaying of 91 miles of rail at various Wyoming points at a cost of nearly \$2,000,000.

Forty-three miles of track will be re-laid between Black Wolf and Toulon in Kansas at a cost slightly under \$1,000,000.

Close to completion is a 36-mile relaying project between Julesburg and La Salle in Colorado. Cost is about \$750,000.

Relaying of six miles of track at Soda Springs, Ida., at a cost of over \$100,000 has been completed.

Majority of the projects involve the substitution of track weighing 131 pounds per yard for lighter rail.

2,4-D IS USED TO CONTROL THISTLES

The mixture, 2, 4-D can be used to control Canadian thistle in grain, according to Harry McNeal, who is working in farm crops at the Union experiment station.

Mr. McNeal explained that although the thistles weren't killed by the application of one pound of parent acid in two hundred gallons of water to the acre, they were set back to such an extent that they are just now beginning to grow again. This method of control prevents seeding and allows the grain to be harvested without the worry of spreading this noxious weed.

A 15-acre field was sprayed, with the exception of four square rods which were left for a check. Comparing the stand of grain in the sprayed and unsprayed area, there is no doubt about the increase in yield where the 2, 4-D treatment was used. The actual amount of increase will be published after the harvest.

GOOD STALLIONS NOW AVAILABLE

Outstanding stallions for breeding purposes may be obtained by ranchers or farmers in the county who are interested in government remount horses for next year, according to information received by Harry Sandquist, county agent, from Colonel F. W. Koester, officer in charge of the remount area.

"The army horse breeding pro-

gram has for its primary objective the production throughout the United States of large numbers of good horses suitable for raising," states Colonel Koester.

"The remount service utilizes several different breeds, the bulk of which is thoroughbred. The present allotment also includes a few Arabian, Morgan and standard stallions," he continued.

Two such stallions are already placed in the county—"Good Justice" at the H. M. Shaw ranch at Jamieson and "The Persian" at Roy Brewer's place near Ontario. Colonel Koester has stated that their stallion slate will soon be completed for next year and breeders who desire stallions should apply for them now.

Before assigning a stallion to a new agent, the facilities for the horse must first have been completed and approved by the headquarters western remount area at Box 378, Pamona, California. A copy of the requirements for facilities for these stallions may be secured from the county agent's office.

Go to Lake—

Mrs. Sylvester Heiner, Mrs. Lloyd Lewis and Mrs. Robert Holman and their children spent from Friday until Sunday vacationing at Payette lakes. Mr. Heiner and Mr. Lewis joined the party Saturday.

THIRTY YEARS OF FARM ELECTRIFICATION

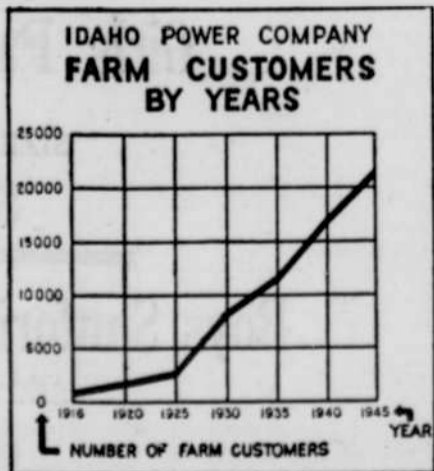

Country Schools Benefit From Farm Electrification Through Idaho Power's Substantial Tax Payments

Property taxes paid by Idaho Power Company are allocated within each county to the various taxing districts on the basis of miles of electric lines within each district. In this manner the 5547 miles of farm lines in the Company's system are a dual benefit to farm people—delivering electricity to perform a multitude of household tasks and chores around the farm, and providing a substantial tax contribution to country school districts.

Privately-owned electric power companies throughout the nation pay about 25 cents out of each dollar received in taxes of all kinds—Idaho Power last year paid 28 cents out of each dollar received, or approximately 2 1/4 million dollars, in taxes. This money helped support schools and government, local and federal.

In spite of high taxes, Idaho Power's electric rates are among the lowest in the nation, and farms are served at the same rates as town customers. Farm electrification benefits country people and town people

alike, and it has long been a factor in the progress and development of southern Idaho and eastern Oregon. With more than 90 per cent of all farms receiving electricity, Idaho Power's territory is far ahead of most other parts of the nation—the result of many years of effort on the part of the men who operate your electric company.
