Registration In High School To Begin August 27

School Authorities Hope No Harvest Vacation To Be Necessary

Prospective high school students will register from August 27 to August 30, in preparation for the opening of school on September 3, school officials announced.

Ninth graders will register on Tuesday, the 27, the sophomores on the 28, juniors, the 29, and the seniors on the 30.

School will start a week later this year than it has for the past several years. It is hoped that labor will be plentiful enough to eliminate the harvest vacation that has seemed necessary during the past four years. School authorities have found it to be a very disruptive factor, particularly where high school students are involved. Each year it has been the cause of many withdrawals from school. Youngsters fall behind. Become discouraged and drop out of school.

"The new school attendance laws require the children to remain in school until they are 18 or have graduated from high school," school officials said. "Youngsters between the ages of 16 and 18 can secure work permits if certain conditions are met. Among these conditions is the attendance in school of at least five hours per week. Children younger than 16 cannot secure work permits and their employment during school time constitutes an evasion of the law on the part of the parent and of the employer.

"Employers who use youngsters below the age of 18 without a work permit are liable to certain penalties should the state labor commission discover the fact. Parents of children who evade attendance provisions of the law are liable to fine and imprisonment if the evasion is discovered."

Ray Peterson, who will be plant manager of the Avocet corporation in Nyssa, praised the breeders program very highly.

The area of operation of the association will be limited for the time being to the district between Ontario and Adrian, with a central office in Ontario. Later a route will probably be established toward Vale and north of Ontario. A man approved by the college extension service will be employed as technician to handle the program when sufficient membership has been secured.

Schools which conduct one weekly four-hour session have already begun in Ontario and Nyssa.

Equipment for the instruction will be furnished by the government agency and at the completion of the training program will become the permanent possession of the school district. Approximately 25 veterans will be taught in each class. Part of the instructor's duty will be to visit each farm during the month where students are working. AIR-MINDED DEER VISIT AT AIRPORT; FAIL TO GET RIDE

Two air-minded deer, a three-point buck and a doe, visited at the airport Saturday evening, but Pilot-Manager Gordon Schmelzer was not at home to take them for a ride.

The deer, walking along the road to the airport near the Snake river boat landing, were first seen by the Scuba boys who live nearby. By the time the deer reached the airport on top of the hill they had attracted so many persons they were frightened away. They ran across the top of the hill, crossed highway 20 just east of the bridge and ran onto the hill on the north side of the highway.

While in a field on the hill, the deer were chased by cows and ran back onto the airport side, where they remained at least until dark. Bernard Frost, well known Nyssa sportsman and airplane pilot, who saw the deer, said that in a private conference the buck promise to return September 28, the opening day of the deer season.
