**"This is how We look at it..."**

When we use PUD power, it's like buying our own home. Because a portion of every dollar we spend for electricity goes to pay for our own PUD system. But money spent for private power is like paying rent. You pay for the system and never own it."

**That's why PUD Power is always the best bargain!**

When you pay for PUD power, 25c out of every \$1 goes to pay for your own electric system. PUD customers are paying for their system as they go. When the system is paid for, this 25c goes into lower rates.
