**ELECTRIC  
BROODING  
PRODUCES MORE POUNDS  
FOR MARKET—MORE  
PROFITS FOR YOU**  
Low-cost electric brooding of pigs, lambs and poultry cuts mortality and makes for healthier animals and poults. Electric brooding can cut normal losses in half for pigs and lambs—and that means more pounds of meat for market. Electric poultry brooding, too, means more chicks raised with less work and worry. Increased production and electric brooding go hand in hand.  
This is the time of year to buy or build your electric brooder—or make sure the one you already have is ready to go to work for you. Increase next year's production by inexpensive electric brooding.
