WE MAY REAP THE WHIRLWIND

The United States is sowing its money to the wind and it may reap a whirlwind for its altruistic efforts.

This country has been helping Europeans and orientals with their food problems and now the president proposes loans of many millions to Turkey and Greece. In Greece we are to assume the role that England is no longer able to hold because of her own economic difficulties.

The United States is finding itself more and more in the role of the world's keeper and some day we may have to insist on a new part in the world drama. We really have been playing the role of benefactor, but to many we have been the villain, using our wealth to exploit the poor little rich countries of the world and no amount of money the taxpayers of this country produce will change the minds of many foreign leaders, especially the Russians, who seem to doubt the sincerity of our motives.

We know we can't isolate this nation from the rest of the world, but surely caution and a realistic attitude would pay big dividends.

You'd Be Surprised!

The Shield Of Oliver

is not a new method of identifying good farm machinery.

THE OLIVER HART-PARR TRACTORS were among the first gasoline engines developed.

THE OLIVER PLOW has been the leader among plows since 1855.

THE OLIVER NICHOLS AND SHEPARD THRESHER and combine division was started in 1848.

THE SUPERIOR DRILL of the Oliver company dates back to 1850.

THE OLIVER TRADE-MARK on your machinery is your means of identifying 100 years of service to the farmers of the world in outstanding farm equipment.

Answer to last week's problem: A shooting star is a meteor which becomes luminous by friction with the atmosphere.
