"I'LL BE WITH YOU IN A Giffy"

An unexpected invitation for the afternoon—and guests coming for dinner! But that doesn't stop her from accepting, because her electric range will have the meal prepared and ready to serve when she gets home.

Yes, a complete meal can be placed in the oven and automatic timing and thermostat devices cook it to a turn. Just set the timer . . . then enjoy the afternoon off. Your favorite recipes will be done perfectly when you're ready to serve.

Scientifically designed burners and insulation direct heat into the food . . . that means less heat used because none is wasted . . . and the kitchen stays cooler.

And remember . . . electric ranges are as economical as they are beautiful, particularly at Idaho Power's low electric rates. Ask your dealer to show you the features of the 1947 electric range.

When you build or remodel your home, be sure your plans include enough circuits, right size wire and outlets. It's smart to insist on Adequate Wiring.
