ALL THE CARROTS IN THE WORLD CAN'T DISPEL THE DARK!!

A certain amount of carrots in your diet is supposed to make you see better at night. But—carrots are no help in a poorly lighted home.

Only well placed fixtures, floor and table lamps, in sufficient number, with the right size bulbs, can dispel the gloom of dimly lighted rooms.

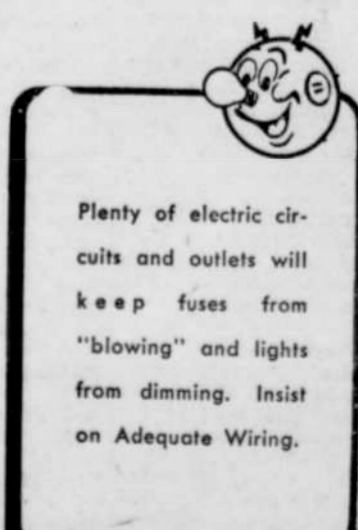

Business firms know that employees' health is better and their work more efficient with good lighting. The same thing holds true in the home. In a well-lighted house the chores are less tiring and done faster... normal eyesight used for sewing, reading, studying is relieved of eyestrain... attractively furnished and decorated rooms are given the beauty intended for them.

Good lighting costs so little, at Idaho Power's low rates. By all means eat carrots, but for just a few cents more a month you can have the added protection of good lighting. Your electrical dealer will gladly recommend the floor and table lamps most suited to your needs.

BETTER LIGHT—BETTER SIGHT

IDAHO POWER

Electricity Does So MUCH—Costs So LITTLE!

Plenty of electric circuits and outlets will keep fuses from "blowing" and lights from dimming. Insist on Adequate Wiring.
