The "flying disks" got such a good press last year that they're back again for an encore. They were first sighted recently around Kentucky and Southern Ohio. Some scientists claim there are no such things as "flying disks" . . . and then there were people who thought Columbus was off his base for saying the world was round. Maybe the disks are an optical illusion . . . but it's a pretty good one when pilots and air field commanders report it. Anyway, you can't blame the disks on Petrillo the music man. He quit making them on January 1. Maybe they're hats being tossed in the ring by Presidential hopefuls.
In Columbus, Indiana, a prisoner who was being released was put back in jail when they found he was stealing 16 prison spoons. He must have been "stir crazy". And if your car is not performing with precision and smoothness, it's stealing money and driving pleasure from you! You'll find that the price of a complete Motor Overhaul is within your budget . . . and it'll save you money in the long run. Drive into the HERRIMAN MOTOR COMPANY, Home of Ford and get the details.
