... Summer Cooking NEVER BOTHERS ME .....

... because I cook with an electric range. "The ad said ELECTRIC COOKING IS COOL COOKING. I don't understand all the technical details of how an electric range is built, but I do know results. My family likes my meals better than ever and they're so easy to prepare. The electric range, with the automatic oven controls, practically does my meals for me while I can tend to other household duties, or take the afternoon off.

"My electrical dealer told me about perfect oven insulation and top burner efficiency. He said an electric range is designed to eliminate heat waste so it cooks quickly and economically while the kitchen stays cool, and every word is true.

"I'm SO pleased with cool electric cooking, and Idaho Power's low electric rates make it doubly economical."
