Speed up Baling with the *New* **OLIVER "88"** and Automatic-Hydraulic Threader

Here's a great time-saving combination!

The remarkable direct drive power take-off of the big new 3-4 plow Oliver "88" tractor is one of the greatest boons to baling. To "ease" the baler's load or clear the machine, just step on the clutch of your "88"—the Oliver power take-off keeps on running! Let out the clutch and you're on your way again. No time wasted by declutching, gear shifting, and re-clutching!

Come in and check the high-tonnage features of the Oliver Ann Arbor Automatic-Hydraulic Threader Pick-up Baler, too. Neat, firm, sliced bales that come apart in good-sized sections are produced.

You can get almost any combination of ground speed and draw-bar pull you want. With its 6-forward-speed transmission, 6-cylinder engine and Fuel Miser governor, you can fit the tractor to the load—and use only the fuel that's needed to do the work.

There are many other valuable, money-saving farm features, plus a choice of three great engines for the fuel you prefer, including a farm-engineered diesel that will be available later . . . interchangeable cast and stamped steel wheels and basic interchangeability of mounted tools with other Row Crop models.

Switch to SLEEPING COMFORT

An electric comforter or blanket keeps your bed warm all over. No matter how cold the nights are in the fall and winter months ahead, you can sleep in warm comfort beneath an electric bed cover. Just turn the switch to the constant warmth you desire.

One cover, in the place of several, is all you need to let you rest warm and relaxed—ready to greet the new day refreshed.

With electric bedding you can look forward to luxurious comfort the instant you retire. Simply switch on the controls a few minutes before and your bed will give you a warm reception.

Electric Blanket

Electric bedding is available in several attractive colors. Ask your dealer about electric bedding comfort, all packaged and ready to enjoy.
