A CORRECT TRUISM

One of the truest of the truisms is that if you sow the wind you will reap the whirlwind. The western powers sowed the seeds of strife with Russia many months ago when the veto was approved as a policy in the united nations. Now, through the mere raising of the hand, the Russian delegation has blocked united nations interference in the Berlin crisis. Russia has used the veto 27 times, mostly to block proposals offered by their allies of world war II.

Russia has used the veto more than the other powers because the Russian system of government is a negative system, designed to crush and destroy, whereas the policy of the democracies is to build, improve and assist. Many have suggested that the democracies treat Russia as she treats others, but that is

practically impossible because of the nature of the two ideologies. One is positive force working for good and the other is a negative force working for evil, so the democracies cannot stoop to the selfish brutality of the Russians and maintain their policy of helping to uplift the world. It again appears that the forces of evil have the advantage. This negative element will remain in force until the people of the world decide they want democracy.

We don't have democracies generally in Europe because the people don't desire to have democratic systems. We can't have successful democracies until the people have the desire in their hearts. We can't buy democracy, we have to fight for it. We can't have a world democracy until people desire it and we can't have world peace until the powerful nations of the world are democratized.

RIDICULOUS!

But not as ridiculous as it sounds, Mrs. Housewife! Remember back in the '30's when you could feed your family well for about \$35.00 a month? If someone had said then that in 1948 you could only feed your family skimpily at \$90.00 a month you would have exclaimed "Ridiculous!" But your food costs are flying high.

A NEW MONOPOLY FURTHER THREATENS YOUR FOOD COSTS!

A small group—the Gillnetter's union—want a "closed shop" on the Columbia River salmon catch. They are getting 70% of the total catch now but they want ALL! So they are aiming at your pocketbook—by trying to eliminate the fixed gear that only catch 20% of the salmon. Remember, this 20% is the balance that can keep your salmon prices in bounds; keep your entire meat budget from ballooning out of sight.

FIGHT THIS FOOD MONOPOLY NOW—YOU CAN PREVENT IT FROM HAPPENING!

The facts show—as reported by the Oregon Fish Commission, June, 1948, that all that happens when you ban fixed gear is that more fish are caught by gillnets.

So, this bill to eliminate fixed gear is not conservation of salmon, but absolute control of the salmon catch. You housewives have had experience with such monopolies. You know what happens to your household expenses! Usually you have had to fight AFTER these conditions exist. Now you can fight BEFORE it is formed. It will be much easier to prevent this "closed shop on the Columbia" by voting 319-X-NO.

Protect Yourself Against Monopoly—Vote 319 NO
