If you're watching the weeds grow in the corn when the haying can't wait—worrying about planting when there's still more plowing and harrowing—or wishing the manure would haul itself when the big tractor's busy... you need another tractor.

With a Farmall Cub, you can plant, cultivate, or mow 12 acres a day... rake at 3 miles an hour... haul faster than a team. And you can spray, pump, run an elevator, plow snow, saw wood, shell corn, grind feed... a hundred other jobs too small for the big tractor.

Come in and see the Farmall Cub. It may be just what you need.
