Good Lighting ...

A LIFT FOR THE EYES ...

The normal human eye is a wonderful organ. It has everything it needs to function properly—except its own lighting system.

We must furnish that light at night and indoors—and the better the light, the more the eye will see. Colors will take on new life; reading, study and chores will require less energy. In fact, good lighting gives a real "lift" to your home . . . and to your eyes.

And good lighting is so easy to have at very little cost. Another floor or table lamp, or a rearrangement of the ones you have may be all that's needed to brighten up your home. Just filling all the sockets with the right-size light bulbs helps tremendously.

Just remember that the eye is continually taking countless pictures and like a camera, its subjects must have plenty of light.

Better light means better sight and when you protect your eyes, you protect your family's as well.

IDAHO POWER
Electricity Does So MUCH—Costs So LITTLE!

We take the Woes and Worries out of Weather

ONE of the grandest things about your Buick is the way you can ignore the season—chew your way through gravel and dust alike, splash through the wet stretches, snug and secure even on slippery pavements.

But bear this one thought in mind ...

Rough road conditions call for special attention to your lubricants. Tires should be checked for correct inflation—for deep, clean tread that bites on a slick surface. Brakes won't stop you with a sure and gentle touch if the master cylinder needs more fluid, or if an air-bubble has worked itself into the line. These things, *and more*, should be checked to keep your Buick at its best.

If that sounds like more than one thought to bear in mind—just drive into our shop and tell the man, "LUBRICARE, please."

Our winter Lubricare treatment covers all these points—with specially trained mechanics following factory specifications as they go over your car from end to end.

Drive in this week, why don't you? The price is surprisingly low. The peace of mind is priceless.
