To get better oil for you...

To bring you the finest products...

To help him earn a good living...

A Standard Oiler works with \$41,073 worth of tools

It has long been known that the better a man's tools, the more he can produce and earn.

The farmer with one plow and a horse cannot produce anywhere near as much as today's farmer with a gang plow and a tractor. And today's oilman is a far more efficient producer of good products than ever in history...because he is backed by a tremendous investment in tools.

Every one of the 29,970 employees of Standard of California and our subsidiary companies has behind him \$41,073 worth of equipment. With it, he produces more and earns more than ever before—his average income last year was \$4083.81 in wages.

It is our responsibility to keep his "kit of tools" in excellent shape and provide more if he needs them. To that end, \$450,000,000 has been invested in new plants and facilities since the close of the war.
